SAVAGE
GEAR *it's a savage world*

DRIVEN BY INNOVATION

Catching monster pike on vast lakes, dropshotting for perch in urban waterways, searching for sea bass on rocky shores – whatever your lure fishing passion, Savage Gear shares it with you. Born out of a genuine love for modern lure fishing and its community, Savage Gear has been helping anglers around the world chase their dreams since 2005. We have grown from humble beginnings to become an all-encompassing brand that offers the best of the best in lures, rods, nets, accessories, clothing – and now even reels too.

Savage Gear is a brand driven by innovation – it defines us, and we wouldn't be where we are today without it. We have been at the forefront of modern lure fishing since our inception, pioneering many unique technologies and ideas that have changed the sport forever. Examples include 3D and 4D scan technology to help us create the most realistic lures on the market, Line Thru lure designs that have revolutionised how people fish for big predators, Pulse Tails that help bring bites even on the toughest of days and one directional fibre reinforcement rod blank technology that gives rods the optimum balance of power and feel. We never stand still, and innovations like these have helped Savage Gear gain a truly global fanbase – anglers across Europe, the United States and the rest of the world have enjoyed catching their dream fish with Savage Gear products. Seeing this only motivates our passionate team even more to continue on the path we are on. Because our team is made up of anglers who love lure fishing just as much as our customers, we know exactly what it means to use a game-changing product that can help you catch the fish of a lifetime.

We don't just make products for the sake of it – we pour passion, innovation and experience into everything we do, pushing the boundaries of modern lure fishing and helping people catch more fish. It's hard to know what will come next, but one that you can be sure of is that whatever the next big thing is in lure fishing, you know it will come from Savage Gear.

Join us and discover why it's a savage world.

savage-gear.com

It's been a long time coming but now the circle is complete and you can finally add premium quality reels to your Savage Gear fishing arsenal. The development of these reels has been one of the biggest in the history of the brand – to make reels we were happy to put the Savage Gear logo on, we had to go back to the drawing board and create them from scratch. The Savage Gear reel range comprises four freshwater reel series and two saltwater reel series and every single one oozes style, quality, industry-leading technology and exclusive features. The standout feature is our proprietary new DuraGrease lubrication that offers unrivalled protection of the gearing from corrosion and wear in almost all conditions. But besides that, the reels carry features such as braid-ready spools, Hydro Sealed bodies and drags, Friction Control drag systems, Torque Shift gearing systems and IPX6 water ingress protection on specific models. The range also covers a wide range of price points, so every angler will be able to own a Savage Gear reel, no matter what they're budget is.

GRC
BODY

GRC
ROTOR

Graphite Reinforced Composite

GRC rotors and bodies are made from a super strong graphite composite material that is also designed to be durable, lightweight and corrosion resistant. Bodies and rotors made from this material are tough, stable and built to last.

CRC
BODY

CRC
ROTOR

Carbon Reinforced Composite

CRC rotors and bodies are designed to offer lower weight and increased stiffness and strength. This material doesn't bend easily and can handle extreme force better than standard graphite materials.

KALLOY **KALLOY**
BODY ROTOR

K-Alloy rotors bodies are made from extremely strong and robust Aluminium – a material which is not only lightweight, but also incredibly rigid. This rigidity means they will not deform under stress, preventing damage to internal parts. K-Alloy bodies stand for superb durability and reliability in a reel.

VSS
VANTAGE
SPRING SYSTEM

Vantage Spring System

The VSS provides a much more precise load deflection when compared to traditional coil springs, which allows for constant pressure and load progression throughout the entire drag force. This gives the reel a consistent drag force, which makes it function much more smoothly and precisely, even in the most demanding circumstances.

SW500 coating

There are many reels out there that claim to be saltwater resistant, but how many of them can boast

500 hours in a tank being sprayed by saltwater and show no signs of corrosion? Answer: none. Except those with our SW500 coating. Most reels on the market are only tested for 196 hours, and hardly any of those would survive 500. Our new coating technology can handle it. It sets a new standard in saltwater protection for fishing reels.

BR-S
BRAID READY SPOOL

With the BR-S, there's no more need to use monofilament as backing on your reels. The spool is supplied with either a rubber band or engraved knurling that stops braided line slipping when under heavy pressure. Nothing should slip when you're playing a big fish.

FCS₁
DRAG

Friction Control System 1

This drag system uses oiled, felt drag washers, which offer a smooth and strong performance.

FCS₂
DRAG

Friction Control System 2

This drag system uses washers made from carbon fibre – this offers an ultra-smooth and more powerful drag.

FCS₃
DRAG

Friction Control System 3

The washers used in this drag system are made in a three-layer design – a fibreglass layer with a carbon fibre layer on either side. This gives the washers unrivalled stiffness resulting in an ultra-smooth and powerful, fish-stopping drag. The washers can also be flipped over and used on either side, extending their lifespan significantly. One of the premier drag systems used in Savage Gear reels.

SAVAGE GEAR TECHNOLOGIES

T-CLIP

This custom-made line clip is designed to be incredibly easy to use and offers just the right amount of tension to hold the line securely in place behind it.

IPX6

International Ingress Protection Rating IPX6 provides protection against high-pressure water streams (100 litres per minute) from any angle for the duration of three minutes from a distance of three metres.

Hydro Seal

Hydro Seal indicates that the reel has at least one specially designed seal to protect against water ingress. This helps to ensure a longer lifespan for reels and that they maintain top performance for longer.

HYDROSEAL

DynamicLine management

Thanks to enabling extended spool lift, DLM means that line will be perfectly distributed over the entire spool. This is a key feature on many modern spinning reels and supports improved drag function, allowing anglers to make longer and more accurate casts.

AeroLip

The Aero Lip is designed to help anglers vastly increase their casting distance and accuracy. The specific, fine-tuned angle of the lip allows the line to leave the spool with far less friction when casting than in standard reels.

HS SEALED BODY

Hydro Sealed Body

A HS-Body features a complete rubber gasket between the side plate of the reel and the main body, which prevents water ingress. Reels with this feature also have a seal on the handle joint, a seal on the dust cover and a seal on the pinion gear, all of which protect the gearing inside the reel to offer many years of top performance.

HS SEALED DRAG

Hydro Sealed Drag

HS-Drag features a rubber gasket to protect the drag system from water ingress, which keeps the system smooth, powerful and reliable.

HANDLE

One place on a reel where you can't compromise on strength and stability is the handle. That's why we have created this super-strong aluminium machine-cut handle, which gives you extreme cranking power and momentum the moment you start reeling in, as well as stability you can depend on.

HANDLE

One place on a reel where you can't compromise on strength and stability is the handle. That's why we have created this super-strong carbon handle, which gives you extreme cranking power and momentum the moment you start reeling in, as well as stability and a light-weight construction you can depend on.

Precision Cut Gearing means that the gear inside the reel is produced from one solid piece of metal during manufacturing – whether that's stainless steel, brass or Aluminium. This results in a stronger, more precise gearbox inside the reel, which offers long-lasting performance even under the toughest conditions.

Fixed Gear Construction (FGC)

In a reel with FGC, the oscillation gear is fixed directly to the body of the reel. This offers a hugely stable and smooth-feeling gear, and also vastly extends the lifespan of spinning reels.

TORQUESHIFT 1

A diecast gearing system for long-lasting and durable performance. It smoothly and efficiently transfers power from the handle directly to the reel's rotor.

TORQUESHIFT 2

A machine-cut Aluminium pinion and/or drive gear for maximum performance and durability. It smoothly and efficiently transfers power from the handle directly to the reel's rotor.

TORQUESHIFT 3

A machine-cut brass pinion and/or drive gear for maximum performance and durability. It smoothly and efficiently transfers power from the handle directly to the reel's rotor.

TORQUESHIFT 4

A super-strong and long-lasting pinion and/or drive gear made from stainless steel. This provides incredible smoothness and efficiency in power transfer between the reel's handle and the rotor – all while being incredibly durable. Built to last.

Spools with TCS have a built-in ventilator, which combined with titanium washers, helps to cool down the drag system during use, reducing the risk of the drag overheating. When a drag overheats, it can affect how well it functions and also vastly reduce its lifespan, but with TCS you keep a cool drag and a constant performance. This system can offer a heat reduction of up to 30% when compared to traditionally designed spools with metal washers. With TCS, overheating is a problem of the past.

E-COATING

A special coating process that is a cross between anodising and painting that generates a corrosion-resistant surface on metal parts. It uses a water-based paint emulsion, which is much kinder to the environment compared to the usual materials used in anodising and offers an eye-catching finish.

DRAGCLICKER

Get a quicker indication of how hard a fish is fighting with our unique baitcaster drag clicker. When a fish takes line, you will get an audible indication from the clicker so you can adjust how you fight it accordingly, resulting in far fewer lost fish.

CENTRIFUGAL BRAKE 6

A powerful and effective centrifugal brake made with six shoes that gives you total control of your cast. It precisely slows the oscillation of the spool towards the end of the cast to prevent backlash – tangles when casting will be a thing of the past.

CENTRIFUGAL BRAKE 4

A powerful and effective centrifugal brake made with four shoes that gives you total control of your cast. It precisely slows the oscillation of the spool towards the end of the cast to prevent backlash – tangles when casting will be a thing of the past.

A smart dial that allows you quickly mark what kind of line you have spooled onto a specific reel. You can note both the breaking strain of the line in lbs and also the diameter – super useful if you fish with multiple set-ups.

DURA OIL

A proprietary oil developed especially for Savage Gear that offers excellent protection for the components of a reel against corrosion and wear. Dura Oil works by creating a special film around treated parts, which shields them from a whole host of hostile forces including damage, debris, water and wear.

DURA GREASE

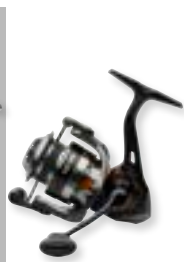

This is our, unique, proprietary grease developed especially for Savage Gear reels that protects the gearing from corrosion and wear. The grease is steam resistant, water and saltwater resistant and operates between -30°C to 160°C, which should cover just about any fishing situation on planet Earth. It's also biodegradable. With Dura Grease, reels will perform at their best for longer.

A great example of the way we built these reels from scratch with nothing "off the shelf", the SG8 is a feature-packed monster constructed with a strong, stiff and light-weight Carbon Reinforced Composite (CRC) body and rotor. Excellent and long-lasting performance is guaranteed thanks to a sealed Friction Control drag system that uses carbon fibre washers, which deliver unrivalled stiffness, smoothness and fish-stopping power.

An impressive 10+1 stainless steel ball bearings (including two Japanese ball bearings) ensure reliable performance even under heavy use. It also has many characteristics that make it a pleasure to use, such a T-shaped line grip, non-slip spool eliminating the need to use mono backing and an ergonomic EVA handle. All the innovative thinking you've come to expect from Savage Gear has been poured into this reel – it will quickly become an extension of you.

Trade Unit 1

To make a reel with peerless strength and power you have to make some compromises, right? Wrong. The SG6 is made with a Carbon Reinforced Composite (CRC) body and rotor, which is designed to increased stiffness and strength but with a much lower weight than standard graphite material. It can handle whatever extreme forces you throw at it, and it won't weigh you down.

But it's not all about strength, the SG6 is packed with other smart details such as a Braid-Ready spool that eliminates the need for mono backing, our proprietary Dura-Grease for smooth and long-lasting operation, an aluminium spool, screw-in diecast handle and T-shaped line clip for easier operation.

This reel is going to get big fan club.

CRC **CRC** **TORQUESHIFT** **DynamicLine** **DURAGREASE**

Strong, lightweight and smooth, the SG4AG is a reel that offers performance as good as it looks. Constructed with a Carbon Reinforced Composite (CRC) body and rotor and benefitting from strong and lightweight aluminium components such as the spool and handle, the reel is made to be tough and last the test of time. It also features no less than 6+1 stainless steel ball bearings, including two high-quality Japanese ball bearings, and benefits from our proprietary DuraGrease that protects against corrosion and wear like nothing else on the market. Like all Savage Gear reels, the SG4AG was made with our own specific tooling and innovative ideas including a custom-made T-shaped line clip that is much easier to use than traditional ones, a non-slip spool design that eliminates the need to use mono as backing, and a sealed carbon drag system that offers the ultimate in fish-stopping power and smoothness. Nothing will look better on your Savage Gear SG4 rod than this beauty.

DURAGREASE

Constructed with a body and rotor made from a super strong graphite composite material, our SG4 spinning reels are tough, durable, lightweight and corrosion resistant. But besides offering you the power that you need when you need it, these reels include a host of other exclusive innovations such as our proprietary DuraGrease, an aluminium spool and a spare graphite spool and soft-touch handle. But the reel's best party trick is its ultra-smooth Friction Control drag system that uses washers made from carbon fibre offering unrivalled power and silky smoothness. It will make playing fish as much of a joy as it is to finally get them into the net.

Trade Unit 1

Made from a super strong graphite composite material that offers strength, a light weight and corrosion resistance, the SG2 is an affordable spinning reel that's built to last. It features many unique technological advances that you would not expect to find on a reel at this price point including our proprietary DuraGrease that protects against corrosion and wear, an aluminium handle with soft-touch knob, custom made T-clip that's easy to use, and a spare graphite spool.

The reel is also available with two different gear ratios, depending on the size you choose (1000 to 4000 available). But the best ratio on this reel is that of quality to price – you'll struggle to find a better entry-level spinning reel with as many unique features as the SG2.

Trade Unit 1

Quite simply, we have thrown everything at the SGS10, the pinnacle of the Savage Gear spinning range. It features the very best components and materials combined with some of our most innovative design features and ideas. Strong and light thanks to its aluminium body, rotor and handle, the reel also brings serious performance to the table. It's the first reel to use our Temperature Controlled System (TCS), which uses a combination of an Air Spool ventilator and titanium washers to help cool down the drag system during use. When a drag overheats, it can affect how well it functions and also vastly reduce its lifespan, but with TCS you keep a cool drag and a constant performance. This system can offer a heat reduction of up to 30% when compared to traditionally designed spools with metal washers.

As if that wasn't enough, the reel is pretty much bombproof when it comes to saltwater resistance – it has no less than five of our Hydro Seals, which are designed to prevent water ingress and give the reels a longer life, which is backed up by an International Ingress Protection Rating of IPX6.

This reel could change your fishing... forever.

SGS10

Product Code: SGP008

- Aluminium body and rotor
- Titanium washers
- Temperature Controlled System
- CNC brass gear
- Five Hydro Seals
- IPX6 rating
- HD saltwater resistant reel
- DuraGrease
- 8+1 stainless steel ball bearings
- Screw-in aluminium handle
- Aluminium handle knob
- Power carbon drag system

Tough saltwater fishing environments demand tough fishing tackle. So, how about a reel with a unique coating that easily withstood 500 hours of being sprayed with saltwater in testing? That's our new SGS8, complete with SW500 coating. The reel is saltwater resistant in other ways too, including its sealed 8+1 steel ball bearings, sealed drag system and lightweight and strong aluminium body and Carbon Reinforced Composite rotor. Being able to withstand constant saltwater onslaughts isn't this reel's only quality, though. It also features our Friction Control System 3 drag system, which houses washers made in a three-layer design – a fibreglass layer with a carbon fibre layer on either side. This gives the washers unrivalled stiffness resulting in an ultra-smooth and powerful, fish-stopping drag – it also means they can be flipped over and used on either side to extend their lifespan.

Trade Unit 1

When fishing in saltwater environments, there's plenty to think about – but one thing you don't need to worry about is your reel, thanks to the innovations of our new SGS6 spinning reel. Built with a strong and lightweight aluminium body and a Carbon Reinforced Composite rotor, the reel is designed to deliver top performance time and time again. It also features 6+1 sealed steel ball bearings, a high-performance carbon drag system and our proprietary DuraGrease – all of which combine to help make the reel saltwater resistant, so you can rely on it every time.

Representing the very best of Savage Gear technology and innovation, the flagship SG10 baitcasting reel is loaded with smart ideas to help you achieve your angling goals. Besides the obvious impressive features, such as 10+1 stainless steel ball bearings, a machined gear, DuraGrease and a super strong and rigid aluminium body and side plate, the real standout highlight is the external centrifugal brake. This brake results in easier casting and playing fish, increased casting distance, a reduction in knots and tangles and less trouble when casting in strong crosswinds. This reel series is also versatile – capable of casting lures from five grams and upwards, making it ideal for black bass and pike with medium lures and also zander and perch with smaller, lighter lures. Once you try the SG10, you'll never look back.

Offering power, style, performance and a wide range of unique features – the SG8 series of baitcasting reels has it all. The 100 and 250 size versions are a perfect fit for casting light lures such as softbaits and crankbaits, but they can also handle medium to heavy baits such as larger soft lures or jerkbaits, giving anglers great versatility. These reels are built to be strong and rigid thanks to their one-piece aluminium frames and are ideal for taming all kinds of predators including pike, bass, zander and even perch and trout. Features such as our proprietary DuraGrease, Line-ID, external centrifugal brake and finely-tuned gear ratios mean the reel will run smoothly time and time again.

DISPLAY DELUXE

For reels, rods, lures... your choice
Order accordingly to the size of the shop

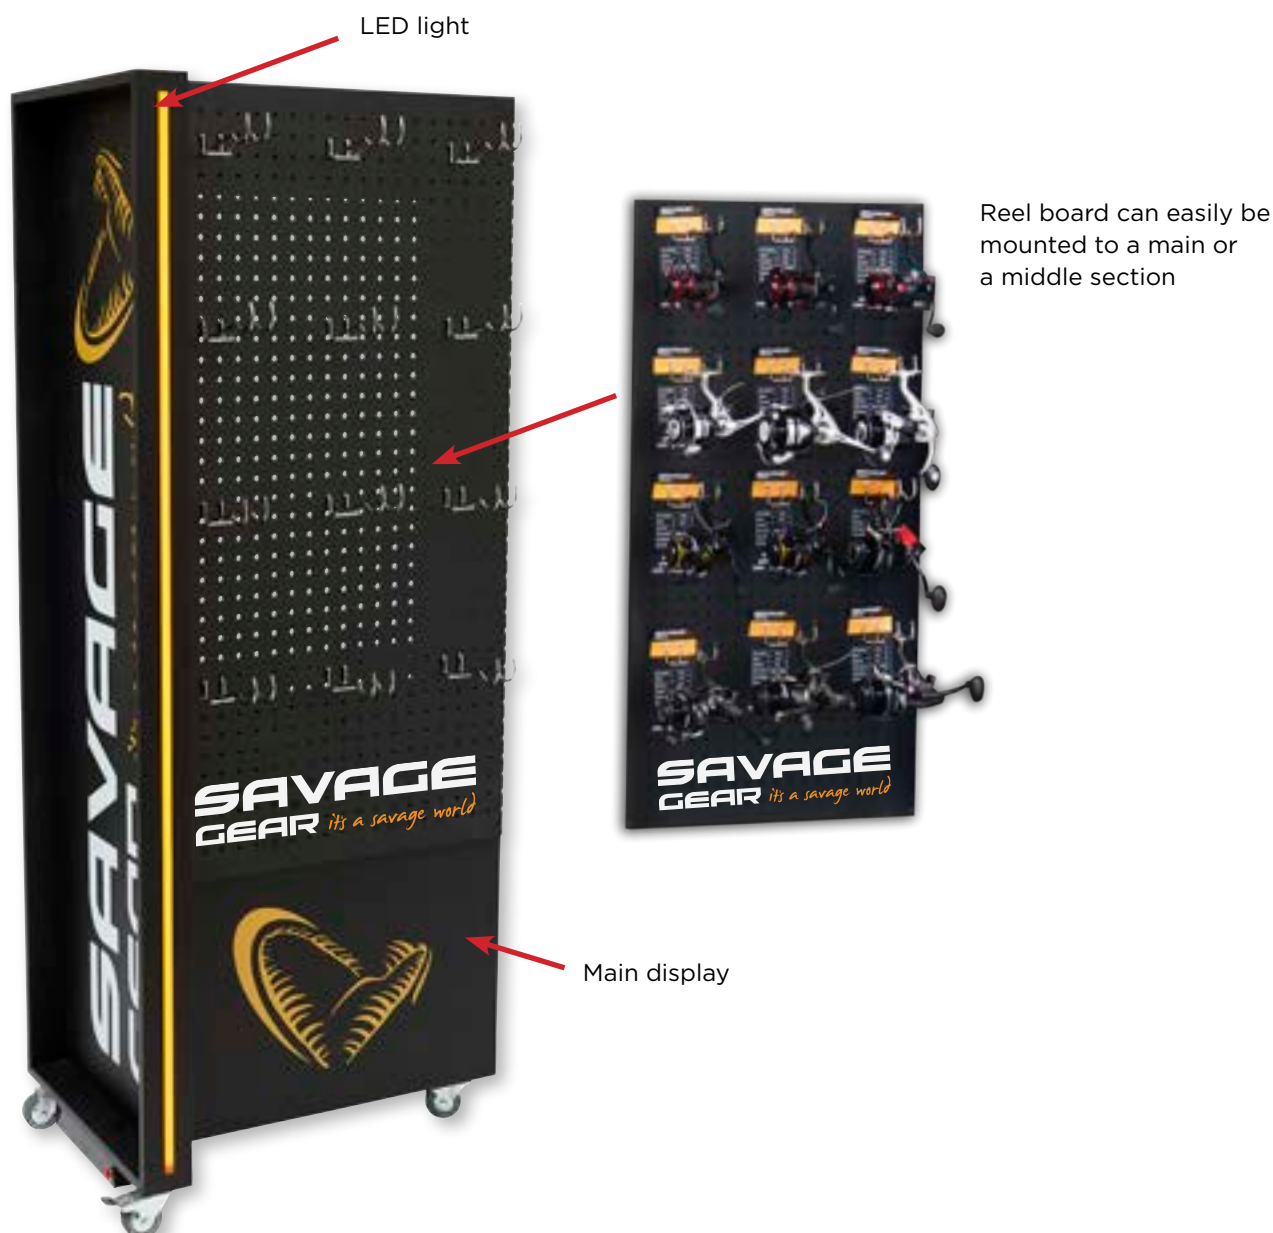

Deluxe display for reels with LED light

We have made a flexible display. It is up to you how the mix of products should be. Depending on the size of the shop or campaign.

One idea is to have our reels on one side and our rods on the other.

You can even extent the exhibition by combining more displays. And by this way having a small shop-in-shop.

The displays are super easy to handle, and will stand out in the shops.

One idea is to have our reels on one side and our rods on the other.

Reel board can easily be mounted to a main or middle section display

This picture shows:

- 2 x main displays with LED light
- 2 x reel boards

DISPLAY DELUXE

For reels, rods, lures... your choice

MAIN DISPLAY WITH LED LIGHT - DOUBLE SIDED

Product Code: SGV012

Dimensions: W580xD400XH1420mm

We have made a flexible display. It is up to you how the mix of products should be. Depending the size of the shop or campaign. Here you can easily mount the reel board, space for 12 reels on each side.

NOTE: Reel board not included.

MAKE A 'REEL' IMPACT

The launch of the first-ever range of Savage Gear reels is bound to make big waves in the predator fishing market. But the product launch itself is one thing – showcasing the products in an interesting and appealing way is another, which will help increase the buzz and the sales within your store.

These high-quality metal reel displays can help you make the most of this exciting range, featuring customisable arrangement with hooks, prominent Savage Gear branding, and in some-cases, a double-sided design to optimise display space.

Not only will these displays help to increase interest, engagement and sales of the exciting Savage Gear reel range, but they also provide excellent security thanks to the supplied anti-theft cables.

Make a splash in your store with these displays and boost the sales potential of a product range that is sure to capture the imagination of predator anglers.

SAVAGE
GEAR *it's a savage world*

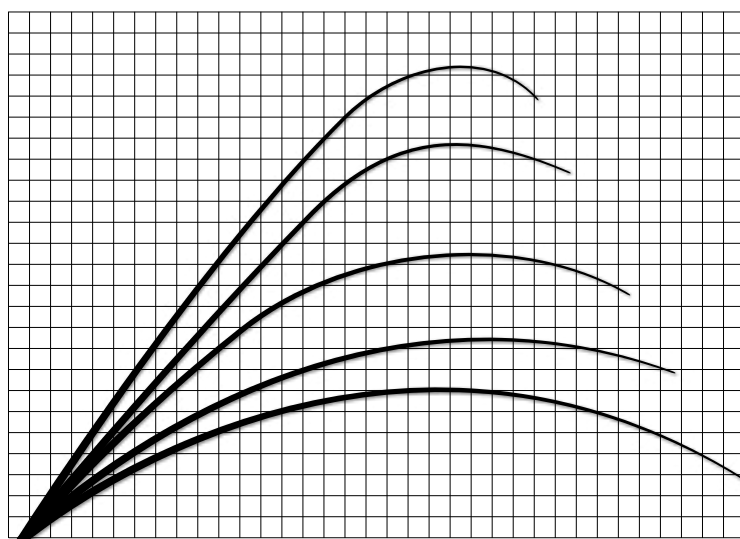

Every rod in the Savage Gear freshwater range has been meticulously engineered to help make the fishing experience the best it can be – no matter whether you are catching tiny perch or monster pike. We have rods for fishing micro or ultra-light game through to heavyweight power game models, all of which feature perfectly balanced actions for their desired application, as well as a perfect blend of power and sensitivity. We also have a range of rods for specialist fishing styles including drop shot, jigging, street fishing, vertical fishing, trolling, twitching, and fishing with shads, crankbaits, spinners, vibes and blades, swimbait and big baits. To put it simply, there is a rod for everyone, and in some cases, it will offer incredible performance that you didn't know was possible. One thing you can be sure of is that you'll catch more with Savage Gear rods.

ACTION

Defining the characteristics of how the rod bends throughout the blank

EXTRA FAST

A tipped bend curve with a stiff bottom and middle section.

FAST

A tipped bend curve, with a stiffer bottom and middle section.

MODERATE FAST

A more tipped bend curve, with a stiffer bottom section.

MODERATE

A moderate parabolic bend curve, with a somewhat stiffer bottom section.

PARABOLIC

Thru-going parabolic bend curve, mainly for downrigger and UL trout rods.

VERTICAL LURE WEIGHT

Defining the lure weight range that the rod is designed to work within for fishing vertically. In other words, what is the minimum and maximum weight that the rod will allow you to use for applying perfect action, yet still retaining feel and power to properly set the hook.

CASTING WEIGHT

Defining lure weight range that the rod is designed to work within. In other words, what is the minimum and maximum weight of lure that the rod will allow you to cast at maximum distance.

POWER CLASS

Defining the power of the rod, from "Super Ultra Light" to "3X Extra Heavy"

SUL	Super Ultra Light
XUL	Extra Ultra Light
UL	Ultra Light
L	Light
ML	Medium Light
MML	Medium Medium Light
M	Medium
MH	Medium Heavy
MMH	Medium Medium Heavy
H	Heavy
XH	Extra Heavy
XXH	Extra Extra Heavy
3XH	3X Extra Heavy

LINE CLASS

Line class rating explains the normal breaking strain of line that can be paired with a properly adjusted reel. If a rod says 8 to 12lb, you should be able to fight a fish with reasonable drag without breaking the rod. You should not run 50lb mainline and a 30lb leader with an 8 to 12lb rod. Line rating is mainly for trolling and downrigger rods.

PE LINE RATING

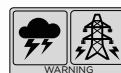

PE line rating refers to the optimum PE braid diameters that provide ultimate performance for a rod, for casting or vertical fishing.

OPT.CW.

Optimum Casting Weight (OPT. CW.) is the optimum casting weight, where the rod performs perfect, effortless, distance and precision casting.

THE BLANK

TORAY
HI-END GRAPHITES
Made in Japan

Savage Gear blanks are made from original Japanese Toray carbon material, with 24T, 30T, 40T and 46T ratings. T stands for tonnage, which is a numeric value for rating graphite. The higher the graphite tonnage, the stiffer the graphite is, and the more vibrations are transmitted through the rod. As tonnage increases, less material is required to achieve the same action, thus reducing the weight of the rod and increasing its sensitivity.

One Directional Fiber Reinforcement (1DFR) increases blank durability without sacrificing weight or sensitivity.

CCS COIL CONTROL SYSTEM

Coil Control System enables smoother and longer casting with braided lines.

SAVAGE GEAR *it's a savage world*

GAME STYLES

MICRO GAME

Designed for tiny lures, these perfectly balanced rods give you optimal feel and sensitivity with fast yet forgiving actions to play fish safely without hook pulls or line breaks. Ideal for use with tiny soft lures, spoons and wobblers.

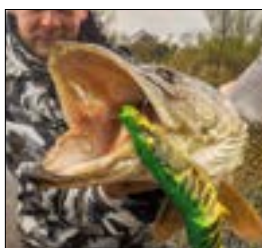

FAST GAME

Rods designed for use with medium to medium-heavy lures. Perfectly balanced with optimal feel and a fast, powerful action to outmuscle bigger fish safely without hook pulls or line breaks. These extremely versatile rods are perfect for fishing soft lures, hard lures, spinnerbaits and spoons.

ULTRA LIGHT GAME

Designed for small lures, these perfectly balanced rods give you optimal feel and sensitivity with fast yet forgiving actions to play fish safely without hook pulls or line breaks. Ideal for use with small soft lures, cranks, spinners spoons and twitch baits.

POWER GAME

Designed for fishing with big lures, these perfectly balanced rods have optimal feel combined with a powerful, moderate-fast action to handle heavy lures and outmuscle bigger fish safely without hook pulls or line breaks. The casting models feature long, split handles and the spinning models feature full rear handles. Ideal for big lures, swimbaits, spinnerbaits, gliders and jerk baits.

LIGHT GAME

Rods designed for small to medium lures. Perfectly balanced for optimal feel with fast yet forgiving actions to play fish safely without hook pulls or line breaks. Ideal for small soft lures, cranks, spinners, spoons, twitch baits and Carolina rigs.

DISTANCE GAME

Rods designed for fishing with medium-light to heavy lures from the bank. They are perfectly balanced, offering optimal feel and fast or extra-fast actions to feel the slightest touch and set the hooks, even on long lines. You can play the fish safely without fear of hook pulls or line breaks. Ideal for soft lure jigging, twitch baits, pencils, top-water lures and metal jigs.

MEDIUM GAME

Rods designed for medium lures, perfectly balanced for optimal feel with fast yet forgiving actions to play fish safely without hook pulls or line breaks. Ideal for soft lures, cranks, spinners, spinnerbaits, twitch baits and Carolina rigs.

SPECIALIST STYLES

DROP SHOT SPECIALIST

Specialist rods that have been fine-tuned perfectly for drop shot fishing techniques. They feature optimal feel and performance, making it easy to achieve perfect lure presentation.

FINEZZE SPECIALIST

Finezze Specialist rods are fine-tuned for ultra-light to medium predator fishing with both soft and hard lures. Extremely lightweight and perfectly balanced with fast or extra-fast actions, these super sensitive rods help to maximize lure control and to feel the slightest touch, with plenty of power to set the hook on any predator.

T/C FINEZZE SPECIALIST

These rods are fine-tuned for fishing with Texas and Carolina rigs, but are also excellent for other predator fishing techniques using soft, hard, or metal lures. Extremely lightweight and perfectly balanced with fast or extra-fast actions, these rods have slightly more sensitive tips to help maximize lure control and to feel the slightest touch, with plenty of power to set the hook on any predator.

STREETSTYLE SPECIALIST

Designed for fishing with ultra-light to medium-light soft and hard lures in urban environments such as harbours, canals or small lakes and rivers, the Streetstyle Specialist rods are a street angler's dream. Super lightweight and perfectly balanced with moderate-fast or fast actions, they feature high-viz tips to help maximise lure control and see and feel the slightest touch, with plenty of power to set the hook on any predator.

VERTICAL SPECIALIST

Created specifically for vertical bottom jigging and pelagic sharp shooting, these extra-fast action rods deliver an amazing blend of sensitivity, strength and lightness. They are perfectly balanced and have faster response times than other vertical rods to give you maximum lure control and to help you feel even the slightest touch, with plenty of power to set the hook and play fish safely without hook pulls or line breaks.

JERK SPECIALIST

Created specifically for fishing with jerk baits, these perfectly balanced rods have great feel with full rear handles and long front handles for excellent grip and comfort. Featuring fast actions, these rods are stiff, but also super responsive and forgiving to help you maximise lure control and feel even the slightest touch, with plenty of power to set the hook and play fish safely without hook pulls or line breaks.

TUFF GAME SPECIALIST

Tuff Game Specialist rods are specially designed for fishing with big, nasty lures to catch big, nasty fish. They feature powerful, moderate-fast actions to handle heavy and extra-heavy lures effortlessly and outmuscle big fish safely, without hook pulls or line breaks. They feature full rear handles and long front handles for perfect grip and comfort. The ideal rods for all big heavy-duty lures, be it swimbaits, shads, spinnerbaits, bucktail spinners, gliders, or jerk baits.

CRANKBAIT SPECIALIST

Fine-tuned for fishing with light to medium sized crankbaits and lipless crankbaits, these extremely lightweight rods help you to maximise lure control and cast long distances with small and light cranks. They even help compensate the missing stretch of fluorocarbon when using braided line. The super sensitive blanks make it easy to feel the slightest touch of a fish, bottom contact, or even to judge the action of the lure.

VIB & BLADE SPECIALIST

Vib & Blade Specialist rods are specially designed and fine-tuned for fishing with light to medium sized metal vibration and blade lures. Extremely lightweight and perfectly balanced with moderate-fast actions and amazing sensitivity to maximize lure control – they help you feel the slightest touch, with plenty of power to set the hook on any predator.

SPINNERBAIT SPECIALIST

Spinnerbait Specialist rods are designed for fishing with spinnerbaits and offer perfect balance and optimal feel. A split rear handle and long front handle give perfect grip while the extra-fast action and super responsive, stiff, yet forgiving tips help you maximise lure control and feel the slightest touch, with plenty of power to set the hook on any predator.

BIG BAIT SPECIALIST

Rods with powerful progressive blanks, that are reinforced to be able to handle and throw big baits, followed by hard strikes and hook-ups with strong fish.

SWIM BAIT SPECIALIST

Designed to throw big lures and handle hook-ups with strong fish, the Swim Bait Specialists feature put-in handles and super-strong yet light and sensitive carbon blanks with 1DFR tips.

BASS STYLES

CRANKBAIT SPECIALIST

Specialist crankbait rods perfectly designed to help you cast hard baits further with less effort. Featuring soft tips to give you maximum control over your lure and great sensitivity, while still retaining power to play fish safely without hook pulls or line breaks.

FINEZZE SPECIALIST

When scaling down is the best way to catch, these Finezze rods will help you fish very small lures and super fine lines with expert control and precision. While sensitivity is these rods' greatest strength, they also have plenty of backbone to make sure you don't lose fish in the fight.

JIG & CRAW SPECIALIST

Specialist rods designed for jig and craw fishing. Perfectly balanced for the optimal feel with fast yet forgiving actions to play fish safely without hook pulls or line breaks. Ideal for fishing structure along the bottom when fishing for bass, perch, or other bottom-hunting predators.

DROPSHOT SPECIALIST

Specially designed for precision dropshot fishing, these rods feature a super light and sensitive tip that allows you to manipulate your lure exactly how you want to. Find the spots where other fishing styles cannot reach and stay in the bite zone longer and play fish without fear of hook pulls or line breaks thanks to the fast yet forgiving actions.

T/C RIG SPECIALIST

Rods that are fine-tuned for perfect Carolina Rig or Texas Rig fishing. They feature a powerful backbone that gives you the power to set the hook firmly even on long lines. The sensitive tips allow you to feel every bump on the bottom or nudge from a fish.

SHAKY HEAD SPECIALIST

Designed for use with shaky head baits, these rods are perfectly balanced for the optimum feel with fast yet forgiving actions to play fish safely without hook pulls or line breaks. These rods have plenty of backbone so you can set the hook quickly and steer fish away from cover with ease.

SPINNERBAIT SPECIALIST

Designed specifically for fishing with spinnerbaits, these rods feature perfectly balanced blanks for the optimal feel with fast yet forgiving actions. They make distance casting easy so you can cover plenty of water with a spinnerbait when searching for fish.

SHAD & TWITCH SPECIALIST

A perfect allrounder rod that has perfect balance for the optimal feel with a fast and forgiving action. Ideal for fishing with a wide range of heavier lures such as large shads, jerkbaits. They have plenty of strength, but still allow you to feel everything even on long lines.

SG4 ROD SERIES

The complete range of Savage lure fishing rods, with superb balance, feel and design. Featuring light and strong Japanese Toray carbon blanks with Coil Control guides for precise and effortless casting. Ergonomically designed EVA handles, with Alien Lock Down reel seats for excellent feel and performance.

- Japanese Toray 30T blanks
- Seaguide CCS stainless steel guides with SiN rings
- Seaguide Alien Lock Down reel seat
- 1DFR tips (swimbait rods)

SAVAGE **GEAR** *it's a savage world*

NORDIC SALT WATER RODS

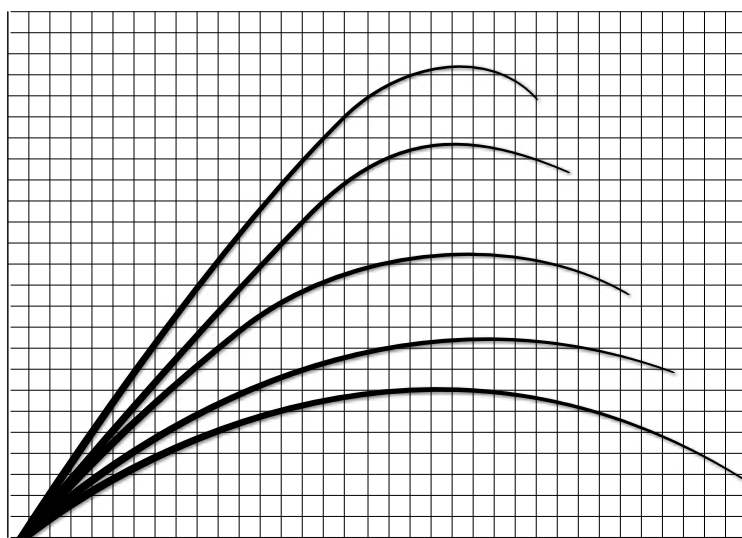

By its very nature, saltwater angling is challenging and changeable. You need equipment you can trust to get the job done, no matter what species you are targeting, nor what conditions you are facing. The Savage Gear saltwater rod family is your saviour – we have an all-encompassing offering that can help you catch almost anything that swims in the seas on Planet Earth. Whether that's coastal sea trout, deep-lying giants like halibut or cod, or hard fighters like wrasse or pollack – you will find a rod to help make fishing easier in our collection. There's no need to fear sea monsters any more.

ACTION

Defining the characteristics of how the rod bends throughout the blank

EXTRA FAST

A tipped bend curve with a stiff bottom and middle section.

FAST

A tipped bend curve, with a stiffer bottom and middle section.

MODERATE FAST

A more tipped bend curve, with a stiffer bottom section.

MODERATE

A moderate parabolic bend curve, with a somewhat stiffer bottom section.

PARABOLIC

Thru-going parabolic bend curve, mainly for downrigger and UL trout rods.

CASTING WEIGHT

Defining lure weight range that the rod is designed to work within. In other words, what is the minimum and maximum weight of lure that the rod will allow you to cast at maximum distance.

VERTICAL LURE WEIGHT

Defining the lure weight range that the rod is designed to work within for fishing vertically. In other words, what is the minimum and maximum weight that the rod will allow you to use for applying perfect action, yet still retaining feel and power to properly set the hook.

POWER CLASS

Defining the power of the rod, from "Ultra Light" to "2X Extra Heavy"

- UL** Ultra Light
- L** Light
- ML** Medium Light
- M** Medium
- MH** Medium Heavy
- H** Heavy
- XH** Extra Heavy
- XXH** Extra Extra Heavy

LINE CLASS

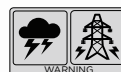

Line class rating explains the normal breaking strain of line that can be paired with a properly adjusted reel. If a rod says 8 to 12lb, you should be able to fight a fish with reasonable drag without breaking the rod. You should not run 50lb mainline and a 30lb leader with an 8 to 12lb rod. Line rating is mainly for trolling and downrigger rods.

PE LINE RATING

PE line rating refers to the optimum PE braid diameters that provide ultimate performance for a rod, for casting or vertical fishing.

THE BLANK

TORAY
HI-END GRAPHITES
Made in Japan

Savage Gear blanks are made from original Japanese Toray carbon material, with 24T, 30T, 40T and 46T ratings. T stands for tonnage, which is a numeric value for rating graphite. The higher the graphite tonnage, the stiffer the graphite is, and the more vibrations are transmitted through the rod. As tonnage increases, less material is required to achieve the same action, thus reducing the weight of the rod and increasing its sensitivity.

GAME STYLES

BOAT GAME

Boat Game rods are designed for big lures, hard fighting saltwater predators and rough conditions. Perfectly balanced for the optimal feel with a powerful, moderate-fast action to handle heavy to extra-heavy lures effortlessly and outmuscle bigger fish safely without hook pulls or line breaks. Great for battling giant Nordic predators like halibut and mega cod, these rods have serious back bone with forgiving tips for fishing with inelastic braids.

INLINE BOAT GAME

Inline Boat Game rods are designed for big lures, hard fighting saltwater predators and rough conditions. Perfectly balanced for the optimal feel with a powerful, moderate-fast action to handle heavy to extra-heavy lures effortlessly and outmuscle bigger fish safely without hook pulls or line breaks. Great for battling giant Nordic predators like halibut and mega cod, these rods have serious back bone with forgiving tips for fishing with inelastic braids.

TROLLING GAME

Trolling Game rods are designed to give excellent performance during trolling with downriggers, dippy divers and paravanes, both in saltwater and freshwater. Perfectly balanced for the optimal feel with a great parabolic action, these ultra-lightweight rods have very durable blanks equipped with guides and components which are made to last, even under the toughest fishing in rough conditions – no compromises made.

INLINE TROLLING GAME

Trolling Game rods are designed to give excellent performance during trolling with downriggers, dippy divers and paravanes, both in saltwater and freshwater. Perfectly balanced for the optimal feel with a great parabolic action, these ultra-lightweight rods have very durable blanks equipped with guides and components which are made to last, even under the toughest fishing in rough conditions – no compromises made.

SHORE GAME

Shore Game rods are designed for shore fishing for sea trout with light to medium lures and are perfectly balanced for the optimal feel with a fast yet forgiving action to feel the slightest touch and set the hooks, even on long lines. You can play the fish safely without hook pulls or line breaks.

SPECIALIST STYLES

SHAD AND METAL SPECIALIST

The Shad and Metal Specialist rods are designed for a broad range of uses, which extends from light jigging for pollack, to fishing for coalfish, or medium-heavy piking for cod. Perfectly balanced for the optimal feel with a powerful, moderate-fast action to feel the slightest touch and set the hooks, even on long lines. You can play the fish safely without hook pulls or line breaks. The lightweight and very durable blanks are equipped with components which are made to last, even under the toughest fishing in rough conditions – no compromises made.

PRECISION LURE SPECIALIST

Fine-tuned for precision casting with lures from the shore, the Precision Lure Specialist range is perfectly balanced for optimal feel. The rods have fast, responsive actions to feel the slightest touch and set the hook on long lines and play fish safely without hook pulls or line breaks. These rods provide smooth, effortless casting and extremely comfortable handling offering peak performance with hard lures, soft lures and metal lures.

SALMONOID ROD SERIES

A brilliant range of classic, super-light rods designed for coastal spinning with lures. They feature fast yet forgiving super-long casting blanks built with Coil Control guides and super deluxe cork handles. Perfect rods for seatrout and seabass.

CUSTOM ROD SERIES

We've worked with our guides and pro staff team over a two-year period to give us an amazing foundation for custom building a top range of rods for modern lure fishing throughout Northern Europe. Each rod is custom built to suit a specific type of fishing with perfection.

The rods feature lightweight Toray carbon fibre blanks with superbly balanced actions. Combine these with new and innovative Coil Control guides, Fuji Gold Label reel seats and AAAA cork handles, and you have a dream series of fishing rods with amazing power, durability and sensitivity. Customised for the connoisseur, with no compromises made.

SGS4

The Savage Gear SGS4 saltwater rod series has been built to offer maximum performance and durability in order to target hard fighting cold saltwater species. The series features a staggering array of rods that cover all situations – from heavy boat fishing for cod and halibut, over sea bass and sea trout fishing from the shore up to active lure fishing for pollock and cod in open water. Every single rod has been expertly designed to be able to handle the needs of demanding anglers and feature technical blanks and high-quality components.

This range truly offers the right tools for all saltwater anglers who are looking for gear to simply rely on.

SAVAGE **GEAR** *it's a savage world*

SOUTHERN EUROPEAN SALTWATER RODS

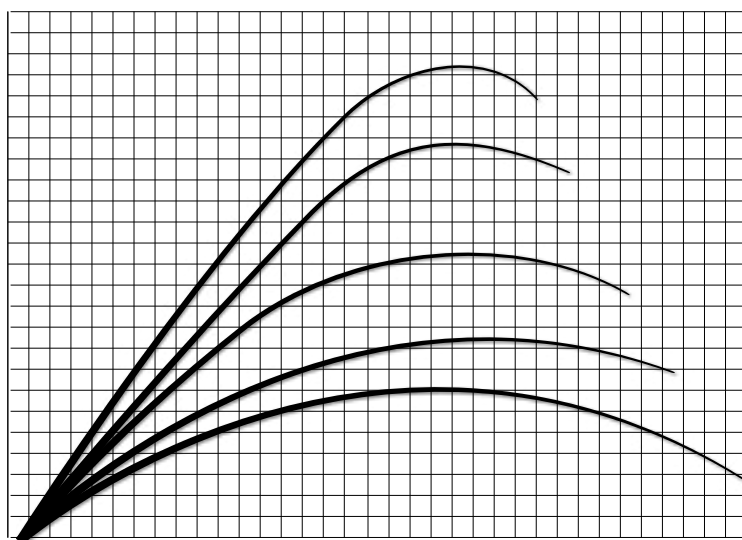

Our saltwater rod collection has undergone a substantial investment project over the last few years, and we are now ready to share the comprehensive range of high-performance rods we have developed with sea fishing fans around the world. The SGS6 series is one of the highlights, featuring a staggering array of rods that cover all situations – including ultra-light game, topwater, long casting, jigging, offshore and even egi. Every single rod has been expertly designed to be able to handle the needs of demanding anglers and feature technical blanks and high-quality components. And for those anglers whose budget doesn't extend to the top end, we have created the SGS2 range – rods that offer amazing performance and durability across a wide spectrum of fishing situations, but at much more affordable price points. Our saltwater rod collection has never been so complete – there really is something for everyone.

ACTION

Defining the characteristics of how the rod bends throughout the blank

EXTRA FAST

A tipped bend curve with a stiff bottom and middle section.

FAST

A tipped bend curve, with a stiffer bottom and middle section.

MODERATE FAST

A more tipped bend curve, with a stiffer bottom section.

MODERATE

A moderate parabolic bend curve, with a somewhat stiffer bottom section.

PARABOLIC

Thru-going parabolic bend curve, mainly for downrigger and UL trout rods.

CASTING WEIGHT

Defining lure weight range that the rod is designed to work within. In other words, what is the minimum and maximum weight of lure that the rod will allow you to cast at maximum distance.

VERTICAL LURE WEIGHT

Defining the lure weight range that the rod is designed to work within for fishing vertically. In other words, what is the minimum and maximum weight that the rod will allow you to use for applying perfect action, yet still retaining feel and power to properly set the hook.

POWER CLASS

Defining the Power of the rod, from "UUL - Ultra Ultra Light" to "HHH - Heavy Heavy Heavy"

UUL	Ultra Ultra Light
UL	Ultra Light
ULL	Ultra Light to Light
L	Light
LL	Light Light (L Hardness 2)
LLL	Light Light Light (L Hardness 3)
ML	Medium to Light
MML	Medium to Medium Light
M	Medium
MM	Medium Medium (M Hardness 2)
MMM	Medium Medium Medium (M Hardness 3)
MMH	Medium to Medium Heavy
MH	Medium Heavy
H	Heavy
HH	Heavy Heavy (H hardness 2)
HHH	Heavy Heavy Heavy (H hardness 3)

LINE CLASS

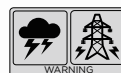

Line class rating explains the normal breaking strain of line that can be paired with a properly adjusted reel. If a rod says 8 to 12lb, you should be able to fight a fish with reasonable drag without breaking the rod. You should not run 50lb mainline and a 30lb leader with an 8 to 12lb rod. Line rating is mainly for trolling and downrigger rods.

PE LINE RATING

PE line rating refers to the optimum PE braid diameters that provide ultimate performance for a rod, for casting or vertical fishing.

THE BLANK

TORAY
HI-END GRAPHITES
Made in Japan

Savage Gear blanks are made from original Japanese Toray carbon material, with 24T, 30T, 40T and 46T ratings. T stands for tonnage, which is a numeric value for rating graphite. The higher the graphite tonnage, the stiffer the graphite is, and the more vibrations are transmitted through the rod. As tonnage increases, less material is required to achieve the same action, thus reducing the weight of the rod and increasing its sensitivity.

One Directional Fiber Reinforcement (1DFR) increases blank durability without sacrificing weight or sensitivity.

Coil Control System enables smoother and longer casting with braided lines.

SHORE ULTRA LIGHT GAME

Designed for small lures (LRF), these perfectly balanced rods give you optimal feel and sensitivity with fast yet forgiving actions to play fish safely without hook pulls or line breaks. Ideal for use with small soft lures, tiny hard lures and micro jigs. These rods work a treat for catching sea bream, saddled bream, combers, mackerel, and all other small-sized predators.

TAI RUBBER – MADAI

Designed for fishing big fish with light gear, these perfectly balanced rods have optimal feel combined with a progressive moderate action to exhaust strong opponents and deliver gentle action on tai rubber lures. Perfect for targeting snappers, john dory, scorpionfish and other bottom feeders.

SHORE LIGHT GAME

Rods designed for small and medium-small lures, but with light lines and leaders. Perfectly balanced for optimal feel with fast yet forgiving actions to play fish safely without hook pulls or line breaks. Ideal for small soft lures, pencils, hard lures and small jigs. Ideal for catching sea bream, saddled bream, mackerel, sea bass, small barracudas, small groupers and other small to medium-sized predators.

IKA METAL & JIG

Purpose-designed for squid fishing with Ika jigs, these perfectly balanced rods have incredible feel with moderate and forgiving actions to play squid vertically without tearing them. These rods have been made to give the best performance and control over all Ika jig styles and are also perfect for micro jigging for other types of fish species too.

SHORE MEDIUM GAME

Perfectly balanced for the optimum feel with fast yet forgiving actions, these rods are made for use with medium-sized lures and will give you the confidence to play fish safely without fear of hook pulls or line breaks. These rods can be broken down into jerkbait, all-round and long casting subcategories that will cover the needs of anglers in any situation, whether using jerkbaits, topwater lures, pencils or soft lures. They will help you tame sea bass, bluefish, barracudas, bonitos, albacores and other medium to large-sized predators.

OFFSHORE SEA BASS GAME

Rods designed for sea bass fishing from a boat, perfectly balanced for optimal feel with fast yet forgiving actions to play fish safely without hook pulls or line breaks. These rods neatly combine fast action blanks, long casting performance and ideal control with important lure types such as jerkbaits, topwaters, pencils, and soft lures.

TOPWATER & SOFTLURE

Designed to help you flawlessly fish with topwater lures and soft lures, these perfectly balanced rods have been made to allow for precise lure control and also give you casting power thanks to their fast actions. A short butt provides better jerking and walking action and also gives you more blank length and power to fight the fish.

OFFSHORE PLUG

Purpose-made for catching big fish with heavy gear, these perfectly balanced rods have optimal feel combined with a powerful, moderate-fast action. They can easily handle heavy plugs and jigs and outmuscle bigger fish safely without hook pulls or line breaks. Ideal for jigs, poppers, big hard lures, pencils, and even big soft lures. Best for catching snapper, amberjack, tuna, grouper and all the pelagic species.

SHORE SQUID GAME

Rods designed specifically for niche art of squid fishing with egi lures. They are perfectly balanced with fast yet forgiving actions to play squid safely without tearing them. These rods offer exceptional performance and control over egi-style lures and can help you land squid effectively whether fishing from rocks or at the port.

JIGGING

When fishing vertically for big fish with speed jigging methods you need a rod that is perfectly balanced. That's what this series is and much more. The rods provide exceptional performance and moderate-fast actions to easily handle heavy jigs and big soft lures, as well as giving you power and control to play fish with confidence. Perfect for targeting snapper, amberjack, tuna, grouper and other pelagic species.

SHORE JIGGING

When fishing for big fish with heavy gear, you need rods that can stand up to the test. This perfectly balanced series of rods offer optimum feel and a powerful, moderate-fast action to handle heavy plugs and jigs, and give you the power to outmuscle bigger fish safely without hook pulls or line breaks. Ideal for jigs, big hard lures, pencils, and even big soft lures, these rods can help you catch snappers, amberjack, tuna, grouper and all the pelagic species.

SLOW JIGGING

Designed for fishing vertically for big fish with light gear, these perfectly balanced rods have optimal performance combined with a powerful, extra-fast action to kick heavy jigs with minimum effort. They also guarantee a smooth and safe fight thanks to their wonderful blanks. Ideal for targeting big snapper, amberjack and other pelagic predators.

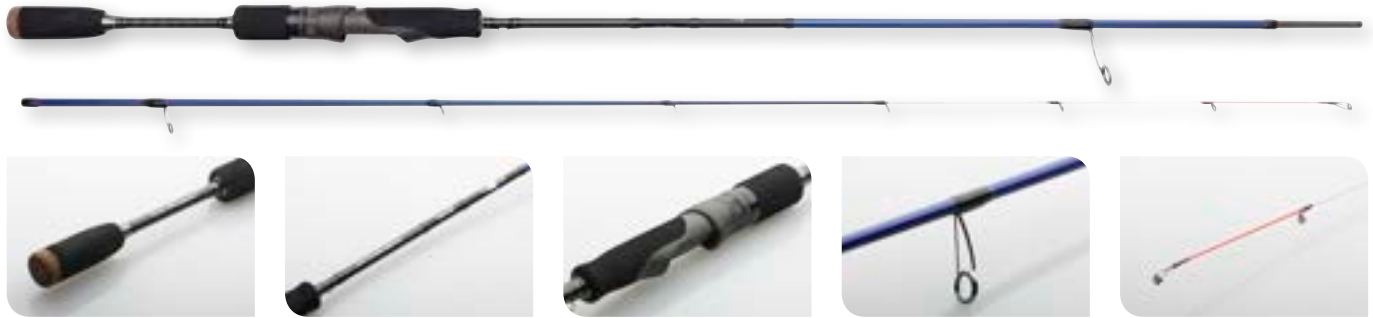

SGS6 RODS

Expertly crafted to handle the demands of experienced anglers, the SGS6 collection represents the best in high quality, technical saltwater rods. Featuring advanced actions, reduced weights and no compromises made with durability or strength, this rod family is built with Japanese 40T Toray carbon blanks, Fuji stainless steel SiC guides and Fuji reel seats. Get ready to fulfil your saltwater angling dreams.

SGS6 TOPWATER & SOFTLURE

Product Code: SGQ133

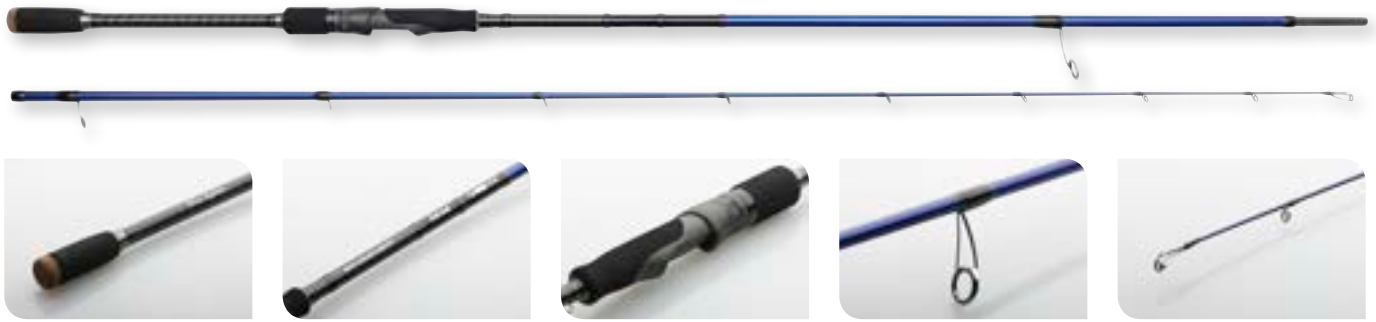

Perfect your topwater lure and soft lure fishing with the unmatched performance of the SGS6 Topwater and Soft Lure rods. This collection allows you to fish walk-the-dog style with ease and jerk your soft lure with impressive precision thanks to extra fast and sharp action blanks. Reduced butt lengths help to minimise wrist impact and maximise the above handle rod length, which helps you to achieve longer and more accurate casts, as well as giving more blank length to fight the fish. Ideal for many situations, these rods are particularly good for sea bass and wading.

SGS6 LONG CASTING

Product Code: SGQ127

Cast huge distances with incredible precision no matter what the conditions with the long-length, technical range of SGS Long Casting rods. Whether you're casting minnows and pencils over the swell or punching lures against a strong wind on the beach, these rods will take it all in their stride. While the lighter class is designed for targeting sea bass in surf conditions, the heavier class is a formidable tool for casting spoons, poppers and minnows for bluefish, big sea bass and other large salty predators that lurk beneath the waves.

SGS6 EGING

Product Code: SGQ123

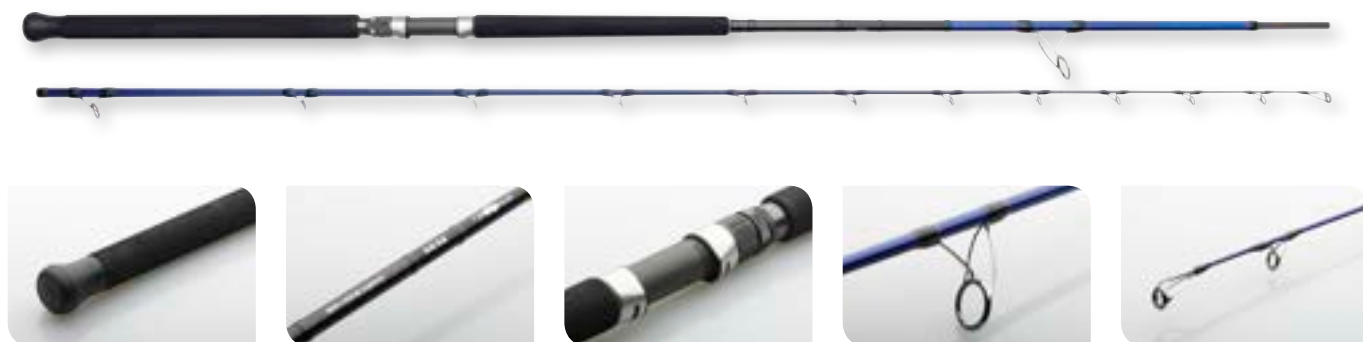

Designed in accordance with the latest Japanese philosophies on how to extract the best of your egi qualities, these technical rods are ideal for this specialist fishing style. Reduced butt lengths lower the wrist impact and also maximise the above handle rod length to help you achieve better casting distances compared with traditional egi rods of the same length. This additional blank space provides a better curve that can help hook squid more easily and avoid tearing off. Try these out for fishing squid and cuttlefish from ports, rock shores or when wading.

SGS6 SHORE JIGGING

Product Code: SGQ130

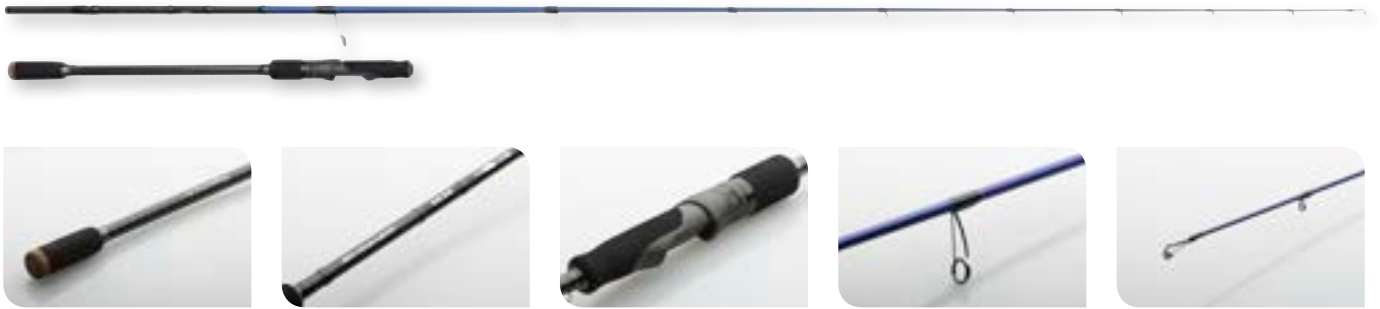

A powerful and technical rod range featuring advanced geometry to make modern shore jigging easy and effective for all. The incredible responsiveness of these rods means that you can easily spring any style of jig into an explosion of fish-enticing movement, resulting in more strikes even on the hardest of days. The combination of great casting ability and unparalleled feel that these rods offer means you can use a wide range of heavy hard and soft lures to scan the currents searching for fish. They also bring increased torque power when you really need it, so you can fight fish with confidence.

SGS6 SLOW JIGGING TRIGGER

Product Code: SGQ131

The SGS6 Slow Jigging rods are technical, finesse rods that have been made to suit Japanese-style slow jigging. They feature extra-fast blanks that are able to deliver the slightest movement of their tip to the jig, even in the deepest waters. They provide excellent performance on both half pitch and long fall slow styles and are ideal for targeting a wide range of predatory fish – they will help you subdue even disproportionately large opponents.

SGS2 LONG CASTING

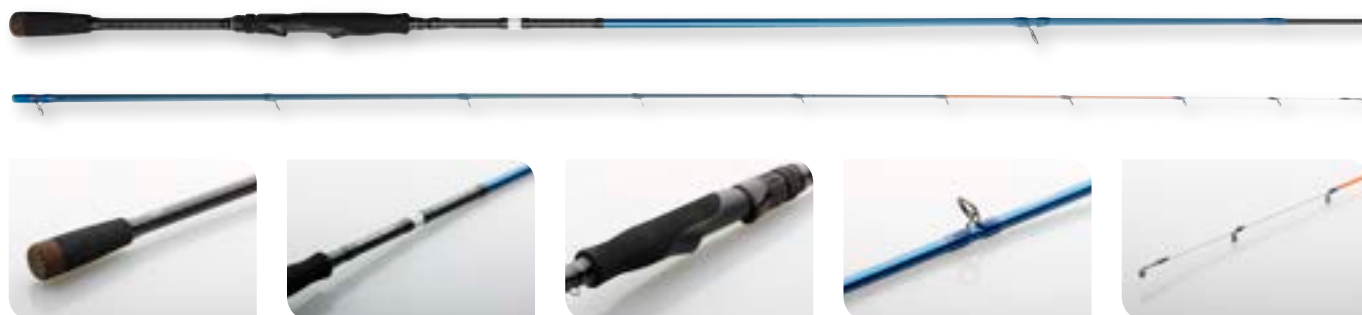

Product Code: SGQ116

Set your sights on the horizon with this long-length rod range that has been created with one thing in mind: superior casting ability. The increased length of these rods makes them ideal for when long range casting is your friend – from casting lures above the swell on beaches or river mouths, to surf fishing for sea bass or bluefish. These rods are particularly useful when fishing minnows, metal lures or spoons and sinking pencils. You'll wonder how you fished without them.

SGS2 EGING

Product Code: SGQ112

These delicate, finesse rods provide unrivalled feel and sensitivity when eging (squid fishing), meaning you can feel even the slightest touch from a squid and be ready to strike. Despite their incredible sensitivity, the blanks in these rods offer a very progressive fast action that allows you to set the hooks incredibly quickly in a squid's tentacles to minimise the risk of tearing. They also allow you to cast further than you might expect – a truly specialist collection of high quality rods.

- SeaGuide Gold Label reel seat
- SeaGuide Gunsmoke SW Guides
- Extra Delicate Egi Blanks
- CCS Guide Setting
- Toray high modulus carbon fibre
- Tough EVA handles
- Deluxe rod bags

SGS2 SHORE JIGGING

Product Code: SGQ119

Bring the power to your shore fishing with the SGS2 Shore Jigging range – designed for use with a wide range of jigs and big, heavy hard and soft lures. These rods have outstanding casting ability and very sharp actions so they can transfer lively actions to any jigs or lures, even when they have been cast super far and are running in deep water. The powerhouse blanks can handle any monster that you are able to hook, even on harsh and rough seabeds – they give you the torque you need.

- SeaGuide Gold Label reel seat
- SeaGuide Gunsmoke SW Guides
- Extra Powerful Reinforced Blanks
- CCS Guide Setting
- Toray high modulus carbon fibre

SGS2 OFFSHORE SEA BASS

Product Code: SGQ118

Become a master of catching sea bass offshore with this extensive collection of rods designed specifically to do just that, by casting or vertically. There's a complete range of casting weights and lengths to help you make the most of any fishing situation. These rods are made to offer exceptional casting and to help you use topwater lures, minnows, sinking pencils or even soft lures flawlessly. Don't let the name of this range fool you; despite being excellent for targeting offshore sea bass, they are also perfect for catching other salty predators such as bluefish and bonitos with remarkable ease.

- SeaGuide Gold Label reel seat
- SeaGuide Gunsmoke SW Guides
- Extra Sensitive yet Powerful Blanks
- CCS Guide Setting
- Toray high modulus carbon fibre
- Tough EVA handles
- Deluxe rod bags

SGS2 OFFSHORE PLUG

Product Code: SGQ117

Made for modern offshore casting styles, this range of rods will allow you to flawlessly use all types of poppers, jigs, and big, heavy hard and soft lures. The SGS2 Offshore Plug rods benefit from aggressive blanks that deliver outstanding casting ability and sharp actions, allowing you to instantly set the hook even at long distances. The powerful blanks allow you to apply perfect actions while jerking, twitching, popping and cast jigging, and also give you the torque you need to fight monster fish. With these rods you can comfortably tame species including bonitos, bluefish, leerfish, albacores, mahi mahi, amberjack and tuna.

SGS2 IKA & JIG

Product Code: SGQ192

Catching Squid with Ika metal jigs is super fun and easy, but adequate rods for this very technical and niche fishing style are normally rather expensive – not any more! SGS2 Ika and Jig rods are super technical, extremely efficient for this demanding fishing style and very affordable. These rods can also be used with micro jigs and small jigs for ultra-light jigging applications – a style perfect for mackerel, sea bream, tunnies and many other species.

- SeaGuide Gold Label reel seat
- SeaGuide Gunsmoke SW Guides
- Extra sensitive, finesse blanks

3D scanned details of the actual fish mimicked by the lure

Rattle system that produces loud, fish-attracting sounds

Lightweight alloy with a low density for a slower fall rate and increased action

High carbon steel treble hook for light tackle applications where strength is required while maintaining excellent hook penetration. Y configuration of the treble hook ensures perfect alignment on the body of the lure for increased hook-up ratio

3D scanned details of the actual fish combined with Photo Print and strike-triggering scent

Allows the lure to travel up the line when a fish is hooked, thus increasing the hook-to-land ratio

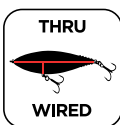

High carbon steel for strength and durability

High carbon steel treble hook for heavier tackle applications where strength is required while maintaining excellent hook penetration. Y configuration of the treble hook ensures perfect alignment on the body of the lure for increased hook-up ratio

Photo Print colours and details from an actual fish

A thru-wired construction for extra strength and durability

Forge carbon steel for enhanced strength

High carbon steel treble hook for heavy tackle and heavy line applications where strength is of paramount importance for success. Y configuration of the treble hook ensures perfect alignment on the body of the lure for increased hook-up ratio

Pulse tail delivers natural swimming action at a variety of different speeds (patent pending)

Strategic weight distribution for long casting performance

Black nickel finish for increased corrosion resistance and reduced visibility of the hook

The T Treble's unique configuration increases hook up ratio on plugs and minimizes wear on a lure's surface

A blend of amino acids, fats, and proteins that triggers feeding and aggression in fish

Provides a focal point for fish to focus in on when attacking the lure

Red nickel for increased corrosion resistance and strike point effect

Seven strands of high carbon steel wire twined and coated with a black copolymer

Glow-in-the-dark pigments used

Blades start rotating immediately as the lure hits the water

Anti-corrosion coating for saltwater environments

49 strands of high carbon steel wire, twined, braided and coated with a strong black copolymer

UV spectrum colours and details utilised for increased visibility to the fish

A see-through colour, with a subtle and realistic look

High carbon steel hook for light tackle applications where strength is required while maintaining excellent hook penetration

49 strands of high carbon steel wire, twined and braided

Fluorescent colours and details utilized for increased visibility to the fish

A non-shiny surface that picks up light and makes the lure very visible

High carbon steel hook for heavier tackle applications where strength is required while maintaining excellent hook penetration

49 strands of high carbon steel wire, twined, braided and coated with a strong blood red copolymer

Precise internal balancing that provides a fluttering action on the fall

Ultra-anti-rust coating with a matte finish to reduce reflection and visibility

High carbon steel hook for heavy tackle and heavy line applications where strength is of paramount importance for success

Prime single-strand titanium wire, with close to zero memory and high strength

360-degree rotation on spin-stop, triggering strikes

High-density tungsten inside

Extremely sharp, highly polished hook points for enhanced penetration

Prime seven-strand titanium wire, with close to zero memory and high strength – also very flexible

Internal rattle that produces sound to provoke strikes

High-density materials utilised

Four carrier PE braided to a smooth, round, abrasion-resistant fishing line

Reduced rattling sounds in a subtle, more natural frequency required for success with pressured fish

Salt impregnated for increased density and flavour

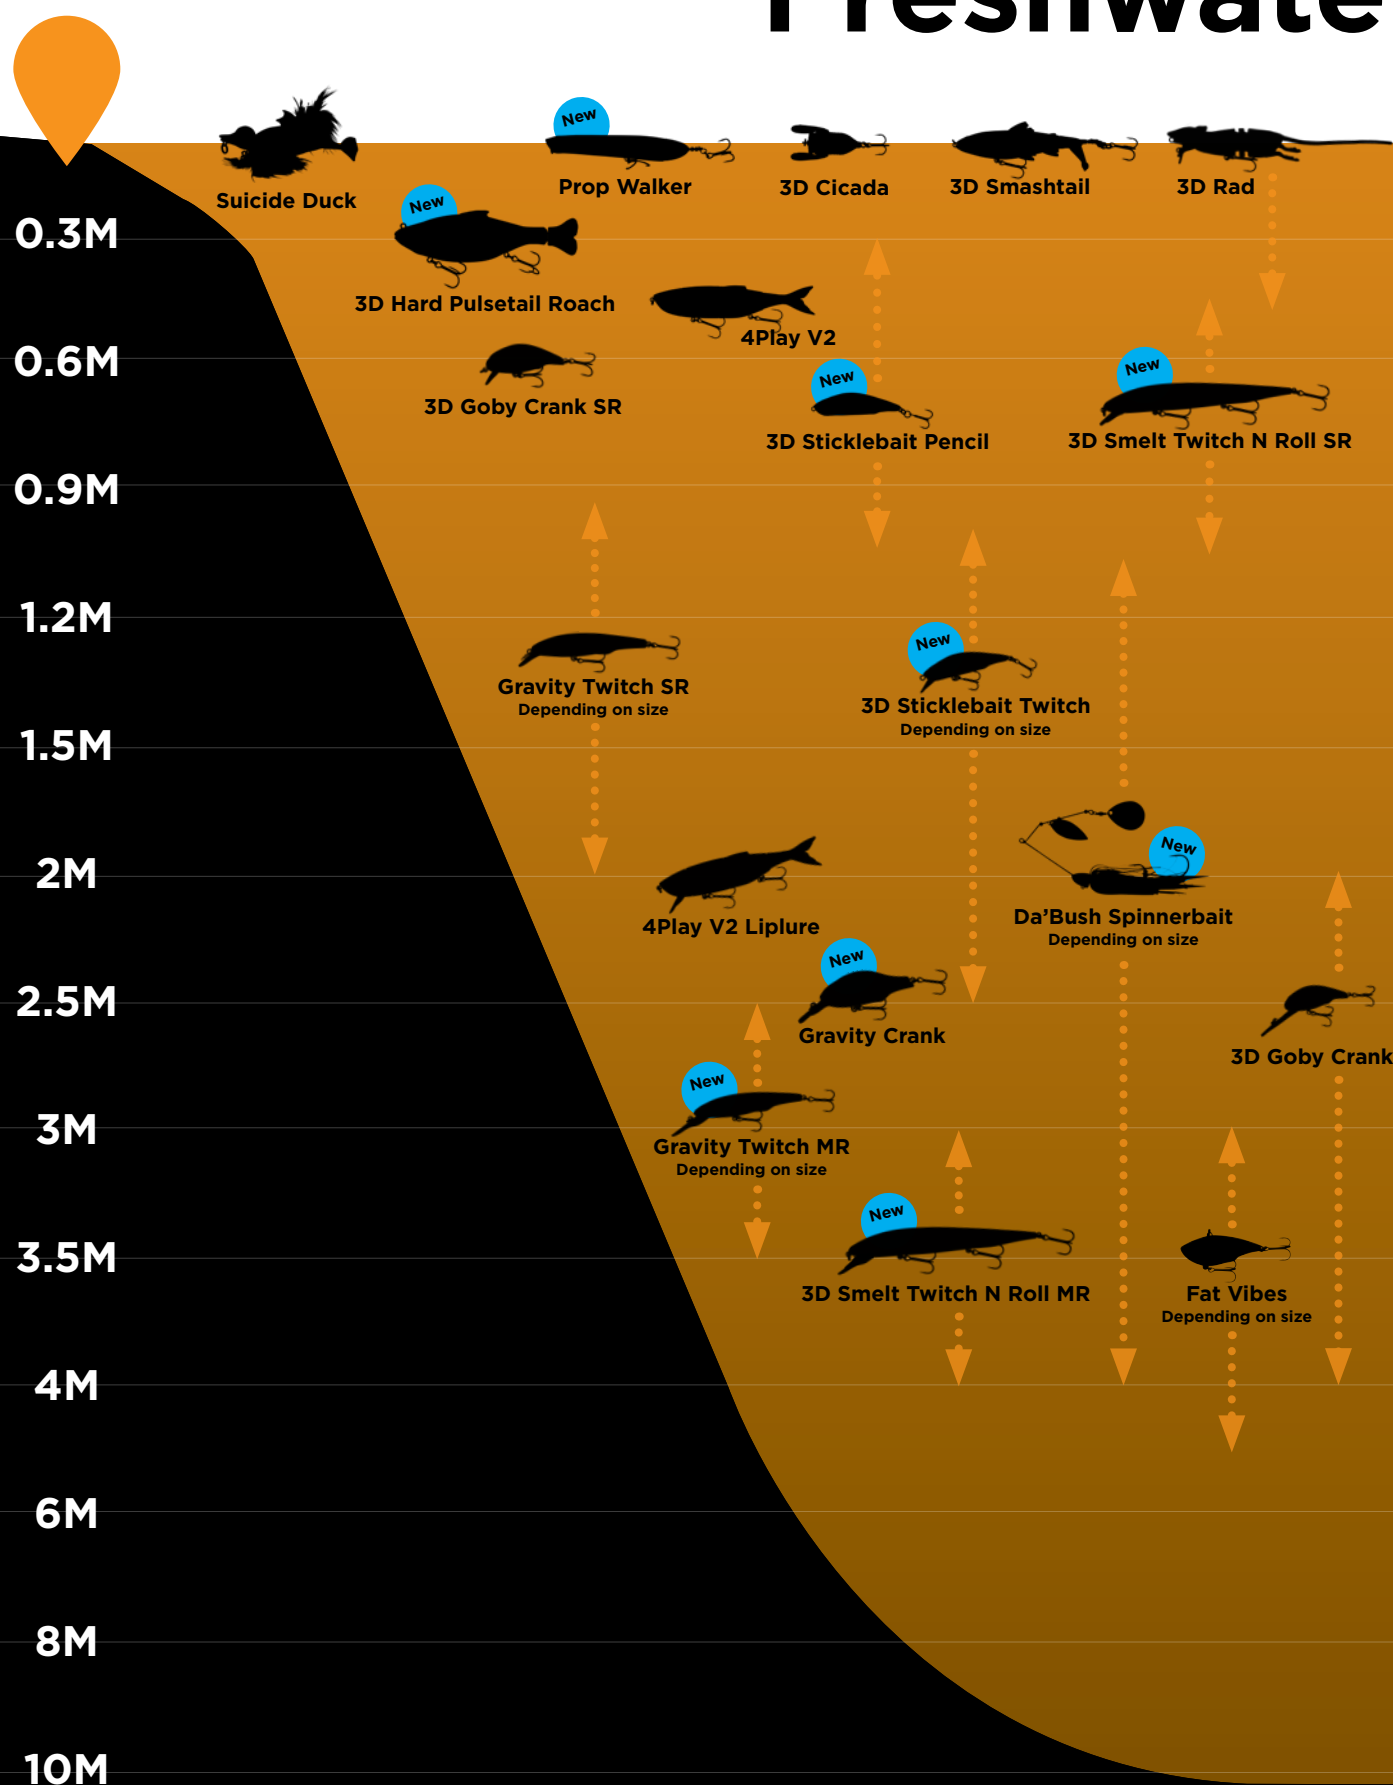

Eight carrier PE braided to a thin, smooth, round, abrasion-resistant fishing line for improved casting and feel

Lure Chart

Savage Gear is synonymous with innovative, fish-catching hard lures. The history of the brand is littered with examples of game-changing lures that have helped shape the course of modern lure fishing as we know it. Examples include the 3D Suicide Duck, 3D Hybrid Shrimp and the Gravity Crank and Gravity Twitch.

New for this year, we have expanded the hugely effective Gravity Twitch range with an MR version and a host of new fish-catching colours on the SR version. Innovation is everywhere you look on this lure range including its magnetic long-cast system, built-in tubular rattle, and swimming actions that simply have to be seen to be believed thanks to the precise balance they are made with.

Our aim when creating hard lures is to set new standards for the market by using the wealth of knowledge, experience, and creativity of our super talented team. Some of our hard lures are so realistic, they have also been known to fool anglers as well as fish!

3D HARD PULSETAIL ROACH

Product Code: SGK269

This unique, long-casting hard lure is based on a 3D scan of a real roach and features an amazingly realistic action, with subtle tail pulsing and straight-line swimming both on slow and fast retrieves. The lure also sends out a distinctive sound that triggers hard strikes from big predators. With perfect balance on the fall combined with that pulsing tail, it's the perfect search lure.

- 3D scanned details
- Photo Print colours
- Pulsing tail action
- Distinctive strike-triggering sound
- Long casting
- SGY 1X BN treble hooks: 13.5cm #4, 18cm #1

3D GOBY CRANK BAIT

Product Code: SGK014

Based on a scan of a real freshwater goby, this little crankbait swims with the most enticing and seductive action. A built-in tubular rattle chamber at the rear makes a great attractive sound. The relatively wide bill will bounce off rocks and the bottom on retrieve, and the lure will move backwards on a spin stop if you give a little slack, triggering hard strikes.

The lure is super effective for many freshwater predator species including trout, perch, pike and zander, which all that just love freshwater gobys.

- ABS hard body
- 3D scanned details
- Tubular rattle chamber
- Erratic swimming action
- Goby Crank 40mm: 2xSGY 1X BN #12 hooks, runs 1-1.4m
- Goby Crank 50mm: 2xSGY 1X BN #10 hooks, runs 1.5-2m

GRAVITY CRANK MR

Product Code: SGK100

Super attention to detail is the key to this crankbait. It has a fantastic wobbling, wide action that displaces a lot of water on the retrieve thanks to a square bill, high-arched back and a high buoyancy, moving up in the water on a spin stop retrieve. The magnetic long cast system with a sliding iron core makes accurate distance casting super easy. A great lure for perch, pike, trout, zander, asp and bass.

- Super details
- Wobbling wide action
- Magnetic long cast system
- Built-in rattle
- SGY 1X BN treble hooks: 5.8cm #6, 7.3cm #4
- Forged strong split rings
- 5.8cm runs 1.3-1.6m, 7.3cm runs 1.4-2m
- Tank tested

GRAVITY TWITCH SR

Product Code: SGK101

The magnetic long cast system with a sliding iron core makes it super easy to cast this lure far and with precision accuracy. It also features a built-in tubular rattle chamber, that sends out a very characteristic sound.

On a steady retrieve, the lure wobbles and kicks wildly, yet still runs straight even in strong current. The lure mimics a small prey fish and the incredible Photo Print details tease the predator fish into striking hard with no hesitation. The lure suspends on longer spin stops and is often hit on the pause. Ideal for catching perch, pike, trout, asp, bass and salmon.

- Super details

Built-in tubular rattle chamber
and sliding iron core

GRAVITY TWITCH MR

Product Code: SGK271

The action on this lure is like nothing else out there. On a steady retrieve it wobbles and kicks in the most enticing manner and runs straight even in strong current. When you twitch it, the lure flits from side to side in an irregular way, flawlessly imitating a small prey fish. It also suspends perfectly on longer spin-stops and many of the strikes come on this pause. This action, combined with the incredible Photo Print details and a built-in tubular rattle chamber, ensure that predator fish strike it hard with no hesitation.

It's also a dream to cast thanks to its magnetic long-cast system and sliding iron core – you'll be hitting precise spots at distance with ease. A great lure for perch, pike, trout, asp, bass and salmon.

- Darting and kicking action
- Suspends with horizontal balance
- Magnetic long-cast system
- Built-in rattle
- SGY 1X BN treble hooks: 8.3cm #6, 9.5cm #4

3D SMELT TWITCH N ROLL

Based on the scan and details from a real Smelt, this hard lure has a super realistic profile and look in the water. The lure swims with an enticing and provoking roll and will dart out to the side when twitched. The horizontal balance and slow rise in the water, provokes the fish to attack the lure hard. Great multi species lure for both trolling and casting. Great for pike, Zander, perch, trout and bass!

- 3D details
- Great darting action on twitch
- Super rolling action
- Horizontal Balance
- Slow rising on spin stop
- 3 super sharp SGY 1X BN trebles #4
- SR runs 0,5-1,2m
- MR runs 1,5-3m

3D RAD

Product Code: SGK008

This 3D rat imitation is so radical we simply had to call it the Rad. It's loaded with innovative features, and the 3D scanned details will fool even the wariest predator fish, enticing them into brutal attacks. The lure is made with a hard, ultra-strong ABS body, a nylon mesh joint, and soft ears, feet and tail.

We have created four brilliant new colours with UV fluorescent effects that will show up even in the murkiest water. The colours attract predator fish, especially pike, which simply can't resist.

Attach the lure on the bill or lip and fish it on the surface, like a rat swimming with a big wake and sub-surface, rolling, s-curve action. Attach the lure on the nose and it will dive down and swim under the surface – make a spin-stop and the lure will pop straight up to the top thanks to its high buoyancy – a brilliant way to provoke really crazy strikes.

The soft ears, feet and tail truly help to set a new standard for rat imitation lures. The tail is reinforced with a braid core and clips onto the body with an innovative clip design that is easy to change.

A superb lure for pike, bass, musky and big, brutal catfish.

- Two action styles – topwater wake and diving swimming
- Belly landing balanced
- Noisy clunking sound
- Superior 3D details and realism
- Braid core reinforced tail
- Easily replaceable tail system
- Spare tail supplied with lure
- Finesse mesh joint
- Real whiskers
- Soft legs and ears
- Ultra-sharp Savage Gear SGY 1X BN hooks (#2 medium size)

3D SUICIDE DUCK

Product Code: SGK006

A highly realistic topwater duckling imitation lure loaded with innovative features. The 3D scanned details will fool even the most cautious predator fish and ensure brutal attacks and hook-ups. It is made with a hard, ultra-strong ABS body with semi soft and durable feet.

The spinning feet give the lure an incredible lively splashing action, leaving a bubble trail in its wake, calling in predator fish from distance. For open water fishing, two feather-covered treble hooks, one on the chest and one on the back clipped to the body, ensure a good hook-up rate. For fishing in snaggy conditions, you can easily remove the treble hook on the belly – the lure is designed so it always lands on the belly with the exposed treble hook on the back.

The lure has two styles of action: attach the line to the beak and the lure will run with a low, discreet posture, like a duckling trying to hide and escape at the same time. Attach the line to the chest and the lure will run higher, with a more panicky fleeing action. The lure can be fished fast or slow, with steady retrieve or long pulls – mimicking a duckling in the most realistic way.

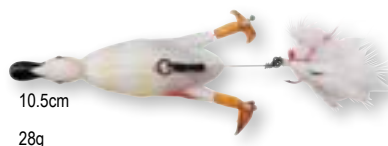

A killer lure for pike, bass, musky and big, brutal catfish

It is said that a great topwater strike counts for 10 regular hits – tie on the Suicide Duck and judge for yourself.

- Great topwater action
- Popping and splashing feet
- Belly landing balanced
- Back hook offers weedless option
- Snug fit hook clips
- Feathered hooks
- Superior 3D details and realism
- Two action styles: low and high fleeing

FAT TAIL SPIN

Product Code: SGK102

A highly versatile, long casting lure with a great action on the drop and on the retrieve. The lure vibrates and flashes at the same time, provoking fish to strike hard.

Cast and retrieve at various speeds and let it fall on a tight line occasionally – strikes will follow. Ideal for perch, asp, trout, pike and bass.

- Immediate rotation tail blade
- Vibrating and flashing action
- Long casting search lure
- Action on both fall and retrieve
- Built-in rattle for 24g size

VIB BLADE

Product Code: SGK103

A long casting finesse blade that vibrates and flashes on retrieve, and swims away from the centreline on the drop. An alluring flashing action that can be fished in several ways – covering midwater and bottom areas – both in currents and still water. The lure has three attach points, that have different vibrating actions – the further back the lure is attached, the more it vibrates. Featuring a stainless steel blade with ultra-sharp trebles, it is a hugely effective lure for perch, pike, zander, asp and trout.

- Long casting blade
- Vibrating and flashing action
- VMS – vivid movement system
- Multiple attach points
- Super sharp and strong treble hooks
- Hooks: 3.5cm, 8.5g, SGY 1X BN #14
- Hooks: 4.5cm, 14.5g, SGY 1X BN #10

B) flashing and gliding shallow

MINNOW SWITCH BLADE

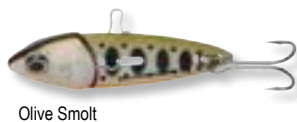

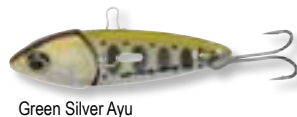

Product Code: SGK020

A duo action blade lure with a unique style. With the snap attached behind the gill the lure will vibrate and flash on retrieve and glide away from the retrieve line on spin-stop. When the snap is attached on the head, the lure will run high like a spoon and glide away from the retrieve line on spin-stop. This is a great search lure and casts brilliantly – it can be worked deep or shallow, in rivers, lakes and even saltwater. A very versatile lure, with a very special action that triggers strikes from just about any predator fish including perch, pike, zander, asp, trout and many saltwater species.

- Long casting
- Tournament clip on double hook
- Fast-change snap
- 5g: #6 hook
- 11g: #4 hook
- 18g: #2 hook

FAT VIBES

Product Code: SGK104

With an amazing swimming action on the fall, a vivid movement system and an eye-catching side flashing and vibrating action –this is one super detailed lipless crankbait you need to have in your tackle box. Extra attraction comes from the loud and attention-grabbing noise that is sent out via the in-built tubular rattle chamber. This lure is made to be cast far, so it is an ideal search lure, but it also performs well for vertical fishing along structure. Expect to catch perch, pike, trout, asp and bass.

- Intricate details
- Side flashing and vibrating action on retrieve
- VMS (vivid movement system) on fall
- Built-in rattle
- SGY 1X BN treble hooks: 5.1cm #8, 6.6cm #4
- Forged, strong split rings

SAVAGE CRAZY SWIM JIGS

Product Code: SGK332

Bring a little craziness to your next fishing trip with these swimming skirted jigs that feature an amazing fluttering and vibrating action that can only be described as crazy! They are mounted with a V-tail minnow and lively silicone skirts, creating a perfect bait-fish profile with erratic action. Other features include stainless steel hexagon stamped blades and ultra-sharp forged high carbon steel fine wire jig hooks with nano points and micro barbs. Stainless steel wire body holder, with pro-peg loop and barb.

This is a superb search lure for perch, pike, bass and most other predator fish out there.

DA'BUSH SPINNERBAIT

Product Code: SGK063

Designed to stay tough fish after fish, the Da'Bush features a strong stainless steel frame with closed snap eye, ideal for adding traces and quick change. A ring on the belly also allows you to add extra weight if required. The blades will explode into an enticing helicopter movement on the drop as soon as the lure hits the water, while the silicone and tinsel skirts go great together with the alluring curl tail silicone trailer. Supplied with a removeable stinger hook.

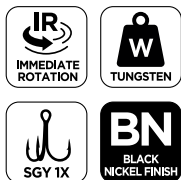

- Stainless steel wire frame
- High carbon forged steel hook in black nickel finish
- Closed snap eye
- Weight add-on belly ring
- Immediate rotation blades
- Hexagon punched steel blades
- Removeable stinger hook
- Silicone curl tail trailer

CAVIAR SPINNER

Product Code: SGK065

With the Caviar spinners, we bring new innovations in quality and design to a traditional lure type in a truly remarkable way. The Caviar spinners have a built-in, offset tungsten ball in the fish egg imitation body, giving incredible casting distance and a true non-kink function. The grade A stainless steel blade has been perfected in shape after thousands of hours of testing to give it the perfect rotation in both rivers and streams as well as stillwaters. Even at slow speed, the lure immediately comes to life as soon as it hits the water. Each spinner is tank tested and is an individual piece of jewellery, constructed using high quality components and equipped with customized Japanese treble hooks. Superb for trout, salmon and most other predators out there.

- Long-cast tungsten body
- True non-kink construction
- Forged stainless steel split rings
- Customized Japanese treble hook
- Immediate rotation

Savage Gear is synonymous with innovative, fish-catching soft lures. Throughout our history we have created some of the most iconic soft lures on the market, including hugely popular product ranges such as 4Play, Line Thru and Craft.

New for this year, we have expanded the Craft Shad range by offering mixed packs of different colours and sizes and we have introduced the amazingly alluring Reaction Crayfish – an incredibly detailed crayfish imitation with legs that shimmer and vibrate with the slightest movement.

Our aim when creating new soft lures is to set new standards for the market by using the wealth of knowledge, experience, and creativity of our super talented team. Some of our soft lures are so realistic, they have also been known to fool anglers as well as fish!

4D LINE THRU PULSE TAIL TROUT

Product Code: SGK025

Based on a scan of a real trout, this lure is incredibly lifelike with amazing details. the pulse tail delivers a subtle yet ultra-realistic action at slow, medium and high speeds. The tail also features a slot for glass rattle and scent to be inserted.

Created with our game-changing Line Thru design, this lure will slide up the trace away from the shredding teeth of the pike. It also means the fish cannot use the weight of the big lure to throw the hook.

- 4D Photo Chrome skin print
- Strike-triggering scent
- Rattle slot in the pulse tail
- Slow sinking
- Easy-change Line Thru system
- Pre-rigged with Carbon49 line thru modifier rig and Y-treble hook
- 16cm: SGY 1X BN #4 hook

4D LINE THRU PULSE TAIL ROACH

Product Code: SGK039

Based on a scan of a real roach this lure is astonishingly detailed and very lifelike. The pulse tail delivers a subtle yet ultra-realistic action at slow, medium and high speeds. The lure has a built-in steel rattle chamber inside the harness – during a steady retrieve the lure is silent, but when the lure is twitched, it will send out an enticing loud clicking sound. The tail has a slot for additional glass rattles or scent additions.

Created with our game-changing Line Thru design, this lure will slide up the trace away from the shredding teeth of the pike. It also means the fish cannot use the weight of the big lure to throw the hook.

- 4D Photo Chrome skin print
- Built-in steel rattle
- Strike-triggering scent
- Rattle slot in the pulse tail
- Slow sink
- Easy-change Line Thru system
- Pre-rigged with Carbon49 line thru modifier rig and Y-treble hook

4D LINE THRU TROUT

Product Code: SGK023

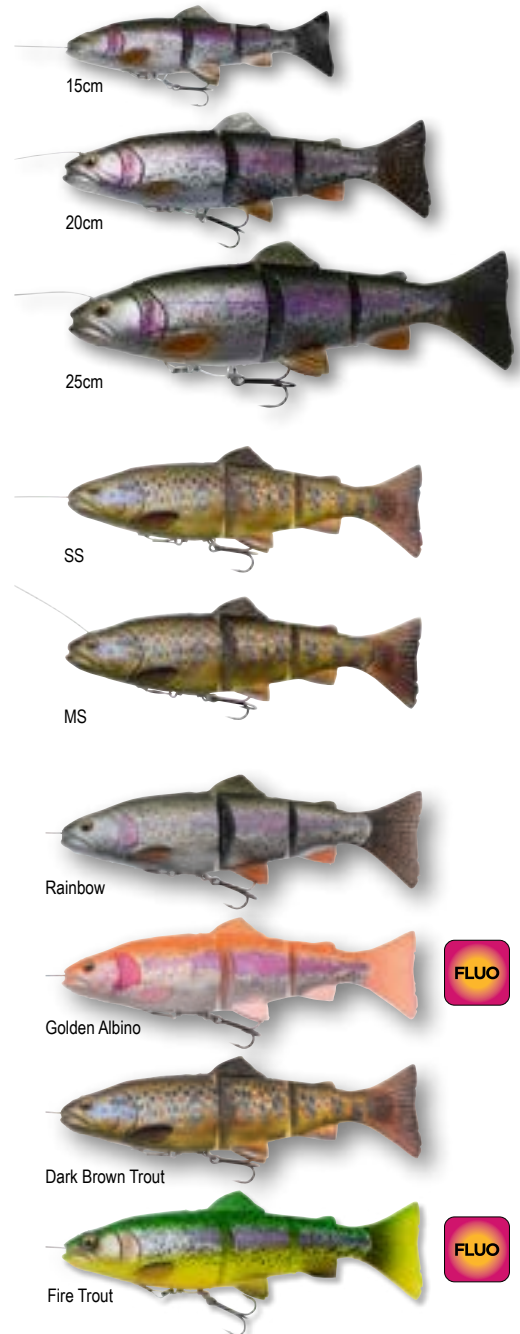

With incredibly detailed Photo Chrome skin print and a strike enticing scent, we have created the 4th dimension with our 4D Line Thru trout. This lure is just so lifelike that the predator fish won't be able to resist making a fully committed attack when they see it. Each lure colour has been extensively designed, tested and fine-tuned to perfection, and the added scent will give you the edge when conditions are tough.

The lure is designed with a larger Line Thru channel, making it easier to change the trace – it comes pre-rigged with the Carbon49 wire trace, mounted with the line modifier clip. The lure has a realistic s-curve swimming action that only adds to the overall realism of this incredible lure.

- 4D Photo Chrome skin print
- Strike-triggering scent
- Easy-change Line Thru system
- Pre-rigged with Carbon 49 wire modifier rig and SGY 1X BN hook

4D LINE THRU TROUT

Product Code: SGK023

With incredibly detailed Photo Chrome skin print and a strike enticing scent, we have created the 4th dimension with our 4D Line Thru trout. This lure is just so lifelike that the predator fish won't be able to resist making a fully committed attack when they see it. Each lure colour has been extensively designed, tested and fine-tuned to perfection, and the added scent will give you the edge when conditions are tough.

The lure is designed with a larger Line Thru channel, making it easier to change the trace – it comes pre-rigged with the Carbon49 wire trace, mounted with the line modifier clip. The lure has a realistic s-curve swimming action that only adds to the overall realism of this incredible lure.

- 4D Photo Chrome skin print
- Strike-triggering scent
- Easy-change Line Thru system
- Pre-rigged with Carbon 49 wire modifier rig and Y-Treble hook
- Green Silver – UV active silver glitter base with realistic smelt details
- Lemon Trout – super hi-viz fluorescent colour on solid white base

4D LINE THRU ROACH

Product Code: SGK105

The humble roach is one of the most important prey for many freshwater predator fish around the world, and we have studied in detail the behaviour, details and movement of this species to create a series of lures that will provoke aggressive strikes from hungry preds.

The Savage Gear 4D Roach series of lures are all based on a 3D scan of a real roach and will amaze you with their details, realism and incredible swimming actions.

Quite simply, this is the pinnacle of roach imitation, that looks and swims exactly like the real thing. Our famous Line Thru system has been further developed, so the hook can swing freely outside the body on the broadest point of the body, ensuring great hook-up and even better landing rates. The new Little Line Thru modifier is a great innovation and the lure can easily be transformed to hold two treble hooks.

The lure's high body profile gives the most amazing s-curve swimming action that cuts and slides to the side on spin-stop – a movement that simply drives the pike crazy.

The slow sink version has the Line Thru channel through the mouth and sinks really slowly. It can be twitched and pulled to perform some amazing glides.

The moderate sink will run deep with a big s-curve action, moving lots of water and really calling in the big ones.

- 4D colours
- Incredible swimming action
- Hard foam inner harness, soft outer body
- Line Thru concept
- Swinging treble on Line Thru modifier
- Two sinkrates – slow sink and moderate sink
- Four amazing colours
- Protective reusable clasp
- Ultra-sharp SGY 1X BN hooks (#1 /18cm)

Rattle in tail slot

4D LINE THRU PERCH SHAD

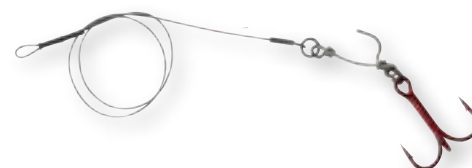

Product Code: SGK029

Based on a 3D scan of a real perch with perfect details and Photo Chrome skin print and added DNA scent, this lure is like no other. Perch are the main prey for big pike at certain times of year, and these super realistic lures will be deadly when the time comes.

The paddle tail makes the lure rock seductively and the rattle in the tail sends out provoking clicks that draw in curious, hungry predators.

This large lure features our brilliant Line Thru design, rigged with the Line Thru modifier and changeable rig – the lure will slide up the trace away from shredding teeth, meaning pike cannot use the weight of the lure to throw the hook.

- 4D Photo Chrome skin print
- Strike-triggering scent
- Rattle slot in paddletail
- Slow sink
- Easy-change Line Thru system
- Pre-rigged with Carbon49 Line Thru modifier rig and red treble hook
- 1x SGY 1X Red #1/0

4D LINE THRU PERCH

Product Code: SGK031

With incredibly detailed Photo Chrome skin print and a strike enticing scent, we have created the 4th dimension with our 4D Line Thru perch. This lure is just so lifelike that the predator fish won't be able to resist making a fully committed attack when they see it. Each lure's colour design has been tested and fine-tuned to perfection, and the added DNA scent will give you the extra edge when conditions are tough.

The 4D Line Thru perch is designed with a larger Line Thru channel, so it is possible to change the trace easily. It comes pre-rigged with the Carbon49 wire trace, mounted with the Line modifier clip. The 4D perch has enhanced details and a slot for a scent or trout pellet. The realistic s-curve swimming action combined with the with the immaculate Photo Chrome skin print and scent make this incredible lure even more effective.

The Line Thru channel through the nose gives the lure a swimming action very close to a real perch and on those days where perch is on the menu for big pike and musky, this lure will help you catch a monster.

Weight spike included in the pack.

- 4D Photo Chrome skin print
- Strike-triggering scent
- Slot for rattle or additional scent pellet
- Easy-change Line Thru system
- Pre-rigged with Carbon49 wire Line Thru modifier rig and red Y-Treble hook

3D ROACH PULSE TAIL

Product Code: SGK038

The Pulse Tail Roach is based on the scan of a real roach, with super realistic details. The pulse tail delivers a subtle yet ultra-realistic action at slow, medium and high speeds. The lure has a built-in steel rattle chamber inside an inner harness, which makes the lure stay silent on a steady retrieve, but when the lure is twitched it sends out a loud, enticing clicking sound. The lure sinks and swims on the drop and is perfectly balanced.

- Built-in steel rattle
- Strike-triggering scent
- Sinking and action swimming on the drop
- Inner hard foam harness with steel rattle
- Rattle slot inside the pulse tail
- Ultra-sharp J-hook and removeable belly Y-treble hook
- 10cm: J Hook #1/0, SGY 1X BN #6
- 13cm: J Hook #4/0, SGY 1X BN #4

4D PIKE SHAD

Product Code: SGK021

Based on a 3D scan of a real baby pike with perfect details, Photo Chrome skin print and added DNA scent – this lure will fool you, let alone the fish you’re trying to catch. Small jacks are the favorite prey for big pike at certain times of year, and these super realistic lures will be deadly when the time comes. The belly-mounted treble hook is attached to a swivel, making it very difficult for a pike to throw the hook during a fight. The paddle tail makes the lure rock seductively and the rattle in the tail sends out provoking clicks to draw in curious predator fish.

- 4D Photo Chrome skin print
- Strike-triggering scent
- Rattle slot in paddle tail
- Slow sink

3D BURBOT SHALLOW

Product Code: SGK048

Burbot imitations don't come any better than this: based on a 3D scan of a real burbot, and rigged for shallow fishing. It features an incredible curl tail swimming action that can be fished dead slow, with a perfectly balanced slow sink rate that makes the lure swim on the drop with a slow tail kick. The inner harness has a built-in steel rattle that makes a loud sound when the lure is twitched. The curl tail also has a glass rattle. Ultra-sharp Y-treble hooks are mounted on a stainless steel stinger arm.

- 3D scanned details
- Super slow curl tail action
- Built-in rattles
- Ultra-sharp Y-treble hooks

3D BURBOT

Product Code: SGK126

Fact: big pike and musky LOVE Burbot! So, why not have one in your tackle box?

This highly realistic burbot lure can be fished via trolling or casting. The 3D scanned details and incredible swimming action will fool even the wariest predator fish to go in for the kill. The detailed pectoral side fins move with an erratic motion, while the tail's eel-like action is very enticing at the same time – just like a burbot swimming suspended midwater. Even the small whisker under its chin vibrates with micro movement as the lure glides through the water.

The inner harness is designed so the lure can either be rigged as a 'Line Thru' with an ABS line through tube, or with the fixed clip release rig to ensure less lost fish and less damage to the lure from the sharp teeth of pike and musky.

The lure is balanced, so it swims gliding forward and downwards with the exact profile of a burbot. This is your new magic lure for fooling pike and musky.

- Line Thru or fixed rigging options
- Ultra-realistic moving pelvic side fins
- Great tail action
- Rattle chamber in tail
- Superior 3D details and realism
- Ultra-sharp SGY 1X BN #1

3D HARD EEL

Product Code: SGK268

A super versatile eel imitation that's loaded with innovative features. The design is simple yet very clever and will ensure superb results when fishing for any predator that naturally targets eel or lamprey. Just fish it with a cast and retrieve with the odd twitch and pause, and you'll be amazed. The long tail is attached by a corkscrew mount and makes the lure rock enticingly from side to side leaving a great eel-like tail trailing behind. When the tail is screwed in 'tail down' position the up force of the tail will push the head of the lure down, so it will run just under the surface at more or less the same depth all the way back. Turn the tail into 'tail down' position and it will force the head up, bringing the lure right to the surface, creating a super wake effect. Combine these two amazing actions with 3D scanned details that will fool even the wariest of predators and you have a winning combination.

- 3D scanned details
- Hard ABS body with corkscrew tail mount
- Supplied with two soft tails
- Built-in rattle
- SGY 1X BN treble hook #1

CRAFT SHAD

Product Code: SGK223

Stare into the big realistic soft eyes of the Craft Shad and you could be mistaken for thinking it was a real bleak. The lure was inspired by that fish and features intricate details and a long slender tail bridge with a T-tail that paddles in a vigorous tight kick and roll on the retrieve and the drop. The lure's slim body makes it perfect for working at depth or in a current. The toolmaking, handcrafted details and painting used on the Craft Shad set new standards for soft lures.

- Soft eyes
- Slender body profile
- T-tail design
- Handcrafted and painted

CRAFT SHAD CLEAR WATER MIX

Product Code: SGK303

Stare into the big realistic soft eyes of the Craft Shad and you could be mistaken for thinking it was a real bleak. The lure was inspired by that fish and features intricate details and a long slender tail bridge with a T-tail that paddles in a vigorous tight kick and roll on the retrieve and the drop. The lure's slim body makes it perfect for working at depth or in a current. The toolmaking, handcrafted details and painting used on the Craft Shad set new standards for soft lures.

- Soft eyes
- Slender body profile
- T-tail design
- Handcrafted and painted
- Clear water mix: Green Silver, Roach, Perch, Motor Oil, Salted Herring

CRAFT CANNIBAL PADDLETAIL

Product Code: SGK261

This brand-new creation has been crafted and designed by legendary lure designer Mads Grosell.

The lure's profile is inspired by a baby trout smolt, with the classic 'Cannibal' open mouth, a realistic big soft eye and a new unique tail bridge design that enables the lure to swim amazingly life-like, even at very slow speeds. The lure swims equally well on a retrieve and as on the drop, and the handcrafted details and painting set new standards for soft lure making. This paddle tail, loose body lure will catch just about any predator fish out there.

- Superior hand-painted details
- Open mouth jig head fit
- Perfect swim tail bridge

3D CRAFT TROUT PULSE TAIL

Product Code: SGK262

Based on our famous 3D trout range, Savage Gear's legendary lure designer Mads Grosell has altered and fine-tuned the head shape for corkscrew rigging and added handcrafted details such as a perfect corkscrew entry on the mouth and a unique pulse tail action with a rattle slot tail. The lure casts very well and can also skip well under over hanging trees.

- Superior hand-painted details
- Perfected for corkscrew rigging
- Rattle slot in the tail
- Unique pulse tail action

CRAFT DYING MINNOW

Product Code: SGK263

Crafted and designed by Mads Grosell, this lure profile is inspired by a bleak with a large, realistic soft eye and foolproof details. The super-thin body enables the lure to swim in an amazingly lifelike way rigged side down on jig heads or drop shots. The tool making, hand-crafted details and painting set new standards in the soft lures market.

LB 4D HERRING SHAD

Product Code: SGK114

With features like our detailed Photo Chrome skin print and strike provoking scent, we have created the 4th dimension with this new herring shad. The details are so lifelike it will be harder than ever for predator fish to resist a fully committed attack. Each lure's colour design has been tested and fine-tuned to perfection and the added DNA scent will give you the extra edge, even when conditions are tough.

The 4D Herring Shad has several updated features. The slightly thicker front section gives better jig head hold and corkscrew options. The soft eyes cannot fall off and we have added a rattle slot in the tail. The mouth has a small hook guide for easy rigging. The slender herring profile with the deadly flanking action, combined with the with the Photo Chrome skin print and added scent, will make an already incredible lure even more effective.

- 4D Photo Chrome skin print
- Strike-triggering scent
- Tail rattle or pellet slot
- Soft eyes
- Hook guide in mouth
- Super flanking action

Rattle slot in tail

3D RIVER ROACH

Product Code: SGK327

Take the well-known power of the 3D Roach and bring it to your favourite river. Featuring incredible details from the scan of a real river roach, the intricate details of the lure are further complimented by Photo Print and strike-triggering scent. The specially designed paddle tail makes the lure kick and roll in a super lively fashion. There is also a rattle slot in the tail on the two larger sizes and in the tail bridge for the two smaller sizes, so you can add audio attraction if required. This is the perfect paddle tail soft lure for perch, pike and zander, but it will catch just about any predator fish out there.

- 3D scanned details
- Strike-triggering scent
- Lively kicking paddle tail
- Rattle slots

BULK

SLENDER SCOOP SHAD

Product Code: SGK325

When you see the slender body profile of this shad subtly rolling and kicking on the fall and retrieve with help from its scoop paddle tail, it will be hard to believe that it's not a real smelt. The finely crafted details of this lure work in tandem with the removable rattle in the tail that sends out an enticing clicking sound to nearby predators. It is the ideal lure for moving water such as rivers or streams, or if you simply want to dive deeper than with a regular paddle tail. It's particularly effective for zander, but will catch just about any predator fish out there. Try it to believe it!

- Superbly crafted details
- Slender body profile
- Scoop paddle tail
- Removable glass rattle in tail bridge
- Scented

PRO GRUB

Product Code: SGK329

Maximum action with minimum effort – that's what's on offer with the Pro Grub. Featuring a nymph-style front body, ripped tail bridge and incredibly lively and very thin curly tail, this lure provides amazing movements even at very slow speeds. It works great with smaller jig heads or even on the dropshot and is a super lure for catching perch, trout and zander – though give it half a chance and it will catch just about any predator out there.

- Lively curl tail
- Super soft material
- Scented

NED CRAW

Product Code: SGK139

Designed to mimic the small crawfish that bass feed on in cold climates, the Savage Gear NED Craw is the most realistic crawfish-imitation NED bait on the planet. We've infused this craw with salt to fine-tune the buoyancy of our Duratech material, delivering amazingly lifelike action of a crawfish assuming a defensive position.

- Hyper-realistic 2.5" Crawfish profile
- Custom duratech formulation for lifelike feel and durability
- Salt infused for ideal buoyancy
- Scent infused to trigger feeding and aggression
- Designed to be fished on savage ned heads

NED SALAMANDER

Product Code: SGK140

Whether the bass are simply after a quick meal or are protecting nests from the amphibians that commonly feed on bass eggs, they're quick to pounce on salamanders. The NED Salamander's ribbed-body design and appendages assure the bait moves in perfect imitation of a feeding salamander to attract the attention of predatory bass and other gamefish. Our Duratech softplastic material is tuned with salt infusion for perfect buoyancy and sink rate.

- Hyper-realistic 3" salamander profile
- Custom duratech formulation for lifelike feel and durability
- Contoured ribbed body helps create turbulence to attract attention underwater
- Salt infused for ideal buoyancy
- Scent infused to trigger feeding and aggression
- Designed to be fished on savage ned heads

NED GOBY

Product Code: SGK141

Designed to mimic one of the favorite prey species of freshwater predators, the Savage Gear NED Goby is the most authentic Goby NED bait conceivable. We've salt-infused the Duratech soft plastic to optimize the Goby's buoyancy, and the NED Goby in action is truly nearly impossible to distinguish from the real thing.

- Hyper-realistic 2.75" Goby profile
- Custom duratech formulation for lifelike feel and durability
- Salt infused for ideal buoyancy
- Scent infused to trigger feeding and aggression
- Designed to be fished on savage ned heads

NED MINNOW

Product Code: SGK142

The profile of this minnow makes it a multi-tool weapon for the tournament angler. Fish it NED style to imitate stunned baitfish during a shad die-off or drag it across the bottom to imitate unsuspecting, feeding baitfish. In addition, its cupped-face design makes the NED Minnow deadly effective as a swimbait with a round ball jig. The Savage Gear Ned Minnow is the most realistic minnow-imitation NED bait on the market. Infused with scent to provoke feeding, and with salt to fine tune the buoyancy of our proprietary Duratech, the Minnow delivers extremely lifelike and subtle swimming action for finesse presentations.

- Hyper-realistic 3" minnow profile
- Custom duratech formulation for lifelike feel and durability
- T-tail design delivers lifelike swimming action
- Salt infused for ideal buoyancy
- Scent infused to trigger feeding and aggression
- Designed to be fished on savage ned heads

3D LIZARD

Product Code: SGK161

We've designed this lizard with an anatomically correct profile and ultra-fine details that perfectly imitate a salamander in the wild. A great choice for a Texas rig, Carolina rig, trailer for skirted jigs and even flipping, the Savage Gear 3D Lizard is a versatile bass-catching tool that excels in diverse conditions. Scent infusion helps trigger feeding and aggression.

- Anatomically correct salamander profile
- Ultra-fine, Lifelike details
- Ribbed for increased presence in the water
- Scent infused to trigger feeding and aggression

3D ARMOR TUBE

Product Code: SGK163

Salt and scent infused, the Armor Tube Worm finally solves the problem with wacky rigging stick worms. No more one fish baits, or baits flying off on a cast after a fish or two. We have placed an armor mesh patch just for wacky rigging.

- Mesh infused for wacky rigging
- No more one fish baits or having to rig each bait with an o-ring tool

RAZORBACK WORM

Product Code: SGK162

The Razorback's aggressive ribbed design actively displaces water, giving the worm a presence in when retrieved like no other worm on the market. Thanks to its reversed ribbing and contoured body, the Razorback moves over obstacles with ease, making it an ideal choice for Texas rigging in shallow vegetation or Carolina rigging for structure offshore. Its elongated curly-tail design delivers an aggressive swimming action with even the most subtle movements, making sure it gets noticed by any bass around. Savage has infused this bait with scent to trigger feeding.

- Aggressive ribbing for increased presence
- Contoured body with reverse ribbing moves through vegetation and cover with ease
- Enlarged ribbontail design provides pronounced, attention-getting vibration
- Infused with scent so predators grab and hold

3D CRAYFISH RATTLING

Product Code: SGK133

Based on a 3D Scan of a real crayfish this lure has almost too-good-to-be-true details and enticing micro movements on its legs and antennas. A rattle slot in the head with removeable glass rattle adds extra sound attraction. Simply a great lure for dropshot and small jig heads.

- 3D scanned details
- Rattle slot with removable rattle
- Micro movement on legs and antennas
- Perfect for dropshot and small jig heads

REACTION CRAYFISH

Product Code: SGK272

With claws that wave temptingly and legs that shimmer and vibrate on the retrieve and fall, this superbly detailed crayfish imitation is excellent for catching a wide range of hungry predators. It features a rattle chamber in its head with a removable glass rattle and has a slot on its back for perfect weedless presentation with EWG hooks. If the water is a little cloudy then you can rely on its strike-triggering scent.

- 3D scanned details
- Realistic action
- Removable rattle
- Weedless hook slot
- Scented with strike-triggering scent

3D TPE MAYFLY NYMPH

Product Code: SGK051

The 3D TPE Mayfly Nymph is based on a 3D scan of a real mayfly nymph and features incredible details even for its small size. The TPE material is very durable, has good elasticity, and can be used on a fly rod. The lure mimics a mayfly nymph to perfection and has the most incredible action with fluttering legs on the drop and tail kick on the twitch. The realistic colours and details will fool the wariest of trout or bass. The lure performs brilliantly in both currents and still water – great for many species besides trout, including perch, chub and bass.

The TPE material (Temperature Elastomer) is a unique soft yet durable material that feels very natural. The fish bite and hold on as if it were real prey. The material is also very durable and will last for many, many bites. Care instructions: don't store TPE with PVC soft lures, TPE material has memory, we recommend to keep it in the supplied clam pack.

RIB WORM

Product Code: SGK273

The intricate and lifelike movements on the RIB Worm are so convincing it's almost better than using real ragworms. This lure swims perfectly even at slow speeds thanks to its ribbed body. It can also attract predators in from afar with its strike-triggering scent. It features hook slots on both the back and the belly and can be easily rigged with EWG hooks or offset worm hooks. Ideal for perch, bass, zander and more.

- RIB ringed body
- Hook slots on both back and belly
- Great tail action
- Scented and salted

PRO GRUB KIT

Product Code: SGK330

The ultimate Pro Grub kit – featuring no less than 40 lures and a handful of super-useful accessories. Featuring a nymph-style front body, ripped tail bridge and incredibly lively and very thin curly tail, the Pro Grub provides amazing movements even at very slow speeds. It works great with smaller jig heads or even on the drop-shot and is a super lure for catching perch, trout and zander – though give it half a chance and it will catch just about any predator out there.

Lure Chart

NORDIC SALT WATER LURES

Catching big predators in cold weather saltwater situations is about as tough as it gets. Often, you'll need to battle harsh conditions, and face long hours fishing at incredible depths – and that's before you consider the brute strength of the fish you'll have to fight once you hook one. For catching hard-fighting salty species you need the right lures for the job, and Savage Gear has them. Whether you're targeting deep sea monsters like halibut, coalfish and cod, or fast-swimming predators like sea bass, there's a Savage Gear saltwater lure that can perform for you. New for this year is the lively and versatile Savage Minnow that can bring bites when all else fails, plus a new version of the famous SG Sandeel with improved action, Pro Peg body holder and internal glass rattle. This collection of lures is creative, high-quality, and high-performance – it has been put together using all of the expertise from our super experienced and knowledgeable team. You won't go far wrong by tying one of these babies on.

SAVAGE MINNOW

Product Code: SGK121

With a lively kicking action both on the drop and retrieve, baitfish imitations don't get much more realistic than this. Utilising a unique rise and stand-up jig head that ensures a perfect action, the lure comes up on the retrieve and stands up when resting on the bottom. The Pro Peg body holder makes it possible to peg the body to the head with a toothpick, creating a very simple and secure hold. The soft PVC body comes pre-rigged with a glass rattle to give the lure an extra enticing sound.

- Super realistic details
- Lively kicking action on retrieve and drop
- Stand-up and rise jig head design
- Forged carbon steel hook with tin finish in #1/0 or #3/0
- Removeable glass rattle in body
- Pro Peg holder for effective hold
- Spare tail included
- Toothpicks supplied for Pro Peg mount

SAVAGE MINNOW WEEDLESS TAIL

Product Code: SGK109

Make sure you keep stocked up with tails for one of our most realistic baitfish imitation soft lures, the Savage Minnow Weedless. Both 8cm and 10cm sizes are available as well as a range of six different proven fish-catching colours. The Savage Minnow has a unique rise and stand-up jig head that ensures a perfect action – the lure comes up on the retrieve and stands up when resting on the bottom. The Pro Peg body holder makes it possible to peg the body to the head with a toothpick, creating a very simple and secure hold. The soft PVC body comes pre-rigged with a glass rattle to give the lure an extra enticing sound.

- Super realistic details
- Lively kicking action on retrieve and drop
- Matches the Stand up and rise jig head
- Back and Belly slot for weedless rigging
- Removeable Glass rattle in body
- Pro Peg system for effective hold
- Toothpicks supplied for Pro peg mount

OPTIMISE SALES BY CREATING VISIBILITY

Product Code: SGV034

The way in which products are displayed to customers is vital – desirability even for high-quality products can be diminished if they are not presented effectively. That's why we have created this effective, eye-catching display that has space for a huge number of products without taking up unnecessary space in your store.

With this easy-to-install display, you can show off the full series of Savage Gear Minnow and Savage Gear Sandeel V2 and engage with your customers in a much better way.

Creating an appealing visual will help you create more sales.

4D HERRING BIG SHAD

Product Code: SGK088

The 4D Herring Big Shad is an intricate imitation of the Atlantic herring – one the most important prey fish for Nordic big game species such as halibut, giant cod and coalfish. It has a lively rock-ing swimming action both on a steady retrieve and on the drop, producing an amazingly realistic fleeing pattern that will fool even the most wary predator fish into attacking. Perfect for jigging and trolling, and catching the very biggest monsters down there in the deep.

- Durable yet soft PVC body
- Super detailed lead alloy head
- Nylon mesh reinforced tail bridge
- Big fish Kevlar stinger (25 & 32cm sizes)
- Four strong-forged steel hooks

CUTBAIT HERRING

Product Code: SGK087

These giant softlures are based on Atlantic herring, the most important prey fish for huge Atlantic saltwater predators such as halibut and giant cod. The lures have been designed in co-operation with some of Scandinavia's most experienced saltwater big fish guides and we have worked hard to achieve superior swimming actions. They also feature customised Japanese forged hooks with unparalleled hooking ability and strength. Our unique under skin painting technique enables us to make each lure look incredibly lifelike. The chosen colours are based on input from the most successful guides in the Nordic saltwater guiding business. The cutbait herring is a superior big fish lure!

- Customised Japanese forged carbon bigfish bend hooks
- Under skin painting technique
- Real herring swimming action and profile
- Lifelike swimming action on drop and retrieve

GRAVITY STICK SERIES

A slim-profile, long-casting range of soft lures complete with high gravity. All the lures have a rattle slot in the main body plus a weight insert slot in the tail area to add even more distance to your cast if required.

The noses of the lures are perfectly designed for easy rigging on our small hitchhikers. The back of each lure has a recessed slot for our 6/0 weedless hooks, plus a hook guide entry point on the belly for precise and easy rigging.

Pintail – a versatile twitchbait-style lure that comes to life on a twitch/pause/twitch retrieve, but also swims with a subtle s-curve action on a fast to medium straight retrieve. It even produces a very subtle no-action on a slow retrieve. The Pintail has a great secondary action on the drop where it shakes and shimmies – all we'll say is hold on!

Pulsetail – offers a very subtle and realistic pulsing tail action on a simple straight retrieve. The body of the lure deliberately has a no-action profile, while the tail seductively pulses all the time. The Pulsetail swims perfectly at a variety of speeds plus it also works on the drop where its subtle shaking and pulsing tail can really get the fish going.

Paddletail – a straight retrieve produces a very lively kicking and rocking action along the whole length of the lure. Designed to sit alongside the Pintail and the Pulsetail, the Paddletail displaces enough water to drive the fish wild yet can still be fished subtly if required.

- High specific gravity
- High salt content
- Slot for rattle in belly
- Slot for weight insert in tail
- Perfect for use with our 6/0 weedless hooks
- Long-casting soft lures, each with a very different and unique action
- Fish the lures with or without belly weights

3D SOFT LINE THRU SANDEEL

Product Code: SGK331

Based on a scan of a real sandeel with incredibly lifelike details, this lure swims with a seducing s-curve action with the head slightly up. On the stop, the lure flutters and rolls backwards triggering very hard strikes from predators. A key feature of this lure is the inner hard alloy core with removable glass rattle at the back – this makes the lure cast a mile and gives it great grip in the water.

Supplied with both GPS single hook and SGY-treble hook.

- Two UV orange and two UV red soft bead
- Two hard beads
- Ring rigged SGY-treble hook #5
- GPS single hook #1/0

3D LINE THRU SANDEEL

Product Code: SGK094

We have carefully studied the swimming action and behavior of the sandeel in order to tweak this lure and the result is incredible. The 3D LT Sandeel swims with a seducing and slim s-curve with its head slightly up. On the spin-stop the lure flutters and rolls backwards like a sandeel fleeing and trying to dig itself into the sand. On the twitch the lure will dart erratically and flash in an incredibly lifelike fashion. The body is made of super strong ABS and has incredible details. The unique inside spear ensures very long casting distances, even in windy conditions. The Line Thru system makes for perfect presentation and ensures that the predator fish can not use the weight of the lure to throw the hook. We recommend the use of

soft fluorocarbon or Finezze mono line as trace.

Each lure is supplied with:

- 1 glow bead
- 1 UV red bead
- 1 clear glass bead
- 1 matt black oval splitring
- 1 wide gape, forged, ultra-sharp, big eye single hook in DG Stealth finish
- 1 SG Y-Treble in DG Stealth finish

3D LINE THRU SANDEEL - THE HOT SPOT COLORS

Product Code: SGK094

During extensive testing, we have found that the seatrout especially winter and early spring months react very strongly and aggressive on the UV red and orange dots, in combination with copper flash. The 4 new hotspot colors, are all finetuned with perfect combinations, that have caught many big seatrout the past season!

LT SEEKER

Product Code: SGK096

The Line Thru Seeker is made for long distance casting even in windy conditions. The blade design allows the lure to swim in a lively and erratic way, with the most incredible 360-degree rotation on the spin-stop, so that the lure spins away from the centreline. Hold on to your rod because this drives the trout crazy, resulting in very hard strikes.

Each lure is supplied with an ultra-sharp treble hook, several different colour soft beads and clear hard beads, to protect the knot.

When a trout is hooked, the lure runs freely up the line and the fish cannot use the weight of the lure to throw the hook. The Photo Print colours are made with sandeel details and offer a simply superb finish.

- Line Thru design
- Lively and erratic action
- 2 clear hard beads, 1 fluo orange soft and 1 fluo red soft.
- 360-degree rotation on the spin-stop
- Ring rigged SGY 1X #5 hooks for both sizes

LT STICKLE BLADE

Product Code: SGK098

This small Line Thru blade with amazing details is inspired by the stickleback, that is on the menu for trout for large parts of the year. The lure has a super enticing, almost dance-like action on the retrieve and can be fished at various speeds – including very slow. On spin-stop, the lure will rotate slowly away from the centerline often triggering hard strikes. The lure can fished both forwards or backwards, giving you two action styles. Superb for ultra-light trout fishing in both fresh and saltwater.

- Line Thru design
- Ultra-sharp treble hook pre-rigged on split ring
- 5 hard beads in glow and neutral colors
- Lively and erratic action
- 360-degree rotation on the spin-stop
- 42mm: ST46 #12, 52mm: ST46 #10

LINE THRU SANDEEL NAIL

Product Code: SGK324

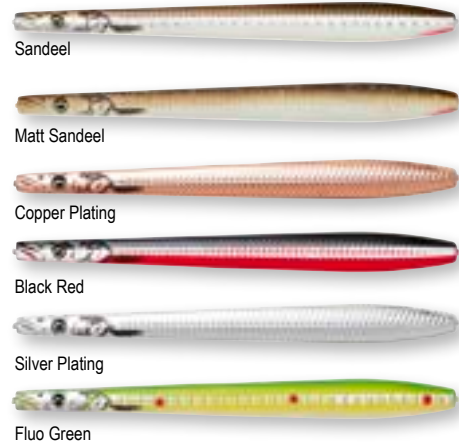

Featuring intricate and realistic details, this long and slender nail-shaped lure is designed to perfectly mimic a sandeel. It swims with a slim s-curve action and both shimmers and rotates on a spin-stop, sending out bright flashes that trigger hard strikes from predators. The Sandeel Nail can withstand extreme distance casting over and over again in any conditions thanks to its super light zinc alloy and internal Teflon tubing construction. Supplied with our super-sharp, ring-rigged SGY- treble hooks and our GPS single hooks, plus soft and hard beads for adaptable Line Thru rigging.

- Perfect Sandeel imitation
- Extreme long-casting design
- Rotation and shimmer on spin-stop
- Made with super light zinc alloy
- Two hard clear beads included
- Two UV red and two UV orange soft beads included
- 16g – Ring-rigged SGY 1X BN #8 treble hook, and ring-rigged GPS #2 single hook
- 20g – Ring-rigged SGY 1X BN #8 treble hook, and ring-rigged GPS #2 single hook
- 26g – Ring-rigged SGY 1X BN #6 treble hook, and ring-rigged GPS #1 single hook

SURF SEEKER

Product Code: SGK118

A super long-casting lure made from a light metal alloy, with a lively, erratic action. On a spin-stop the lure will rotate immediately away from the centerline of retrieve, flashing in the most provoking way. The lure has our unique ISP strike points in the tail.

- Super long-cast design
- Erratic action
- 360 immediate rotation on spin stop
- Wired through
- SGY 2X trebles UAR finish #3
- Strong #3/0 in-line single hook included

SEEKER ISP

Product Code: SGK097

The Seeker lure is designed for ultra distance casting, even in windy conditions. The blade design allows the lure to swim very lively and erratically with the most incredible 360-degree rotation on the slightest spin-stop – creating an incredible flash in the water.

Each lure comes with an ultra-sharp Savage Gear Y-treble hook and a wide-gape beak point lure single hook – so the angler can choose which hook is best for the situation.

The lure benefits from our Intense Strike Point (ISP) technology – by filling pre-drilled holes on the lure's body with the strong night Glow and UV epoxy pasta, we have been able to create the most intense strike points you have ever seen.

The ISPs draw in the seatrout and seabass and they hit the lure hard right in the tail section where the hook is – ensuring a superb hookup rate.

- Super long cast design
- 360-rotation on spin-stop
- Intense Strike Point (ISP) technology
- Ultra-sharp single and treble hooks supplied
- Superb catch rate
- 68mm: ST36#8BN,
- 87mm: ST36#4BN, S1X #4/0
- 98mm ST36#4BN, S1X #4/0
- 100mm ST36#4BN, SG1X #4/0

Single hook supplied for 16 and 23 grams

LIGHT RANGE FISHING KITS

The Light Range Fishing series is inspired by the light rock fishing scene, but with a much broader appeal. It covers all types of modern mini and micro lure fishing – both in saltwater and freshwater. Perch, trout, smaller saltwater species – the applications are almost endless.

LRF MINI SANDEEL KIT
Product Code: SGK092

The Light Range Fishing Mini Sandeel kit combines the great vibrating action of the paddletail Sandeel with the darting action of the Sandeel Slug on the same micro Sandeel jig head. These lures will catch just about any predator fish both in fresh and saltwater. Five colour variants in two models and five jig heads.

Lure Chart

SW lures

By working closely with a team of expert saltwater lure anglers around the world, the Savage Gear saltwater lure collection continues to grow. New for this year are the simply awesome hydrodynamic Sardine Slider and Sardine Glider lures that are absolute fish magnets, thanks to amazing actions on the fall and retrieve and bright, attractive colours. We have also added new squid fishing-specific lures to help cater for this more specialist discipline. With Savage Gear, there is no need to compromise or play the guessing game with lures – we have designs that are purpose-made to do the job you require.

GRAVITY MINNOW

Product Code: SGK227

The Gravity Minnow 50F is the ideal lure for very calm conditions, when fishing light game or LRF style, and will trigger strikes from even very inactive fish. This small minnow is solid and compact – perfect for targeting all small saltwater predators such as mackerel, sea bass, needlefish, small tunnies and sea bream. The floating model is built for easy distance casting and has a super lively reaction whether you retrieve it fast, slow, or anywhere in between. The sinking version has the perfect blend between excellent action and long casting distance. It has an outstanding cast even in unfavorable conditions and makes great side flashes on retrieve. It can be allowed to reach the bottom for rock predators, or start directly from the surface or mid water, resulting in a very versatile lure that covers the whole water column. The fast sinking version is a unique aggressive micro lure that casts extremely well even in rough conditions and makes strong side flashes on the retrieve. It runs perfectly even in strong current and is devastating when fished with a fast-twitching retrieve.

- Flat sided profile for great water grip
- Long cast design
- Built in rattle
- Super steady action
- Strong ABS body
- SGY Saltwater UAR 3X NP trebles (#14)

3D MINNOW POPPER

Product Code: SGK074

This micro popper has the most amazing popping action, and despite the very light weigh, it casts like a dream. This lure attracts attention from just about all smaller sized predator fish and is very versatile. Perfect for aji, mackerel, saddled bream, needlefish, small leer fish and other predators, this lure is an excellent choice for top water micro game.

- 3D scanned details with a big eye
- Loud, popping mouth
- Long casting shape
- Rattling noise
- Ultra-sharp strong Saltwater treble hooks
- Hook size: 4.3cm, 2.6g, #14 ST46 UAR

Fishing methods: after the lure lands try tiny twitching pulls with the rod tip low for a louder popping action, or with the rod high for more of a splashing popping action.

3D MINNOW POP WALKER

Product Code: SGK075

Based on a 3D scan of a baby sardine. The lure is not a popper, it's not a walker – it's both in one – the perfect hybrid of a popping and a walk-the-dog lure. The Pop Walker can perform a perfect walking-the-dog action or it can pop if the angler simply pulls it with the rod tip down. With the rod tip higher, the Pop Walker walks with popping and splashing action. A topwater lure for all light game species and great casting distance.

- 3D scanned details
- Popping and walking action in one lure
- Super natural shape body
- Excellent casting performance
- Super strong ABS body
- Ultra-sharp strong saltwater treble hooks
- Hook size: 5.5cm: 6g, #14 ST46 UAR
6.6cm: 8g, #8 ST46 UAR
8cm: 15.5g, #5 ST46 UAR

Fishing methods: with a slow twitch while retrieving, this lure will perform a wide and slow walk-the-dog action, and with a fast twitch it will perform a faster and sharper walk-the-dog action. With longer pulls and the rod tip down it gives a great popping action.

SLAP WALKER

Product Code: SGK322

There are several key parameters that make a topwater lure special and the Slap Walker has got them all, and then some. The most striking characteristic is the dimpled, golf ball-style surface of the lure, which has multiple benefits: it helps reduce drag in the air to improve castability, it helps boost reflection of light in more directions, and the dimples trap air that gets released as small bubbles when underwater. The flat face of the lure slaps the surface when fished walk-the-dog style or skipping style – this can be heard better by predators thanks to the lure's very discreet rattling. An innovative lure that will catch you plenty of seabass, leafeish, bluefish, mahi mahi, barracuda and other topwater predators.

- Dimpled surface
- Ultra-long cast design
- Strong splash walk-the-dog and skip action
- Built-in rattle
- Super-sharp and strong saltwater treble hooks

GRAVITY POPPER

Product Code: SGK321

With rock-solid build quality, Thru Wire construction and an ultra-long casting design, the Gravity Popper is made to match the needs of monster saltwater fishing. An innovative Hydro Lock Ribbing system minimises the chances of the leader snagging on a rear hook (a common problem with poppers) while at the same time produces extra bubbles. The dimpled structure of the popping area also helps to create more bubbles by trapping air – this results in a different frequency popping sound that is sure to grab the attention of hungry predators.

- Dimpled surface
- Ultra-long cast design
- Hydro Lock Ribbing
- High-noise rattle
- Super sharp and strong saltwater treble hooks
- Strong Thru Wire construction

SANDEEL SURFWALKER FLOATING

Product Code: SGK072

The long and slender body of this lure is based on a 3D scan of a real sandeel and is constructed with a hard ABS body. It features an incredible side-to-side action on the twitch and a slim s-curve action on a straight retrieve.

The floating version has a horizontal balance, which slightly keeps the head up on the spin stop – creating the perfect wounded baitfish profile. The long-cast design is silent – the perfect topwater lure for more wary predator fish.

- 3D scanned details
- Multiple action styles
- Floating, silent version
- Long-cast design
- Ultra-sharp ST46 treble hooks
- Hook sizes: 125mm – #8 ST46 UAR
155mm – #4ST46 UAR
180mm – #2 ST46 UAR

Fishing method: slow twitching while retrieving and the lure will perform a wide, slow side-to-side action. With a fast twitch, it will perform fast and sharp side-to-side action. With the rod tip high and a fast retrieve, the lure will perform a skipping action imitating a fleeing prey fish.

SANDEEL SURFWALKER SINKING

Product Code: SGK072

The long and slender body of this lure is based on a 3D scan of a real sandeel and is constructed with a hard ABS body. It features an incredible side-to-side action on the twitch and a slim s-curve action on a straight retrieve.

This sinking version is made for long distance casting in the surf and rougher conditions and has a noisy rattle in the back chamber. It will come straight to the surface on the retrieve and walk easily from side-to-side with great flash and splash, and a noisy clicking sound.

- 3D scanned details
- Multiple action styles
- Built-in rattle
- Long cast design
- Ultra-sharp ST46 trebles
- Hook sizes: 125mm – #8 ST46 UAR
155mm – #4ST46 UAR
180mm – #2 ST46 UAR

Fishing method: on a medium to fast retrieve the lure will perform a fast and sharp side-to-side action. With the rod tip high and a fast retrieve, the lure will perform a skipping action imitating a fleeing prey fish.

Magnetic silent long cast system

SANDEEL JERK MINNOW FLOATING

Product Code: SGK116

Based on a 3D scan of a sandeel, that is also very close to a baby needlefish. The slim shape, combined with the super natural swimming action, makes this lure very effective. It's a silent lure and has an internal magnetic long-cast system that helps you cast long distances. This floating version is ideal to use in a wide range of fishing spots like rocks, ports or even shallow beaches. The jerk minnow is extremely easy to use, with the most amazing jerk and twitch action – with an almost horizontal balance on the stop and a great roll and flash on the retrieve.

- 3D scanned details
- Magnetic silent long-cast system
- Great jerk and twitch action
- Horizontal balance
- Three ultra-sharp strong saltwater treble hooks
- Hook sizes: 110mm – #10 ST46 UAR
145mm – #6 ST46 UAR
175mm – #4 ST46 UAR

Fishing method: this lure will perform fantastically with slow, medium and high-speed retrieve and will give you the most amazing jerk and twitch action.

SANDEEL JERK MINNOW SINKING

Product Code: SGK116

The sinking Jerk Minnow S is specifically made to cast long distances against strong winds and reach your target. The fast sinking ratio enables the angler to reach deeper areas and retrieve from there. The sinking Jerk Minnow gives you a great advantage in deep ports or rocky shores, where fish often love to stay midwater or near the bottom. Despite the sinking body, the Jerk Minnow retains the amazing jerk and twitch action as its brother, with great roll and flash on retrieve.

- 3D scanned details
- Magnetic silent long-cast system
- Great jerk and twitch action
- Horizontal balance
- Three ultra-sharp strong saltwater treble hooks
- Hook sizes: 110mm – #10 ST46 UAR
145mm – #6 ST46 UAR
175mm – #4 ST46 UAR

Fishing method: This lure will perform excellent with medium and high-speed retrieve and will perform most amazing jerk and twitch action.

SANDEEL JERK MINNOW

Product Code: SGK116

Based on a 3D scan of a sandeel, this slimline lure features a realistic, natural swimming action that could also be easily mistaken for a baby needlefish. The lure's internal magnetic long-cast system makes it a dream to cast while the amazing jerk and twitch action makes it super easy to fish. This lure has almost perfect horizontal balance on the stop and a great roll and flash on the retrieve that is bound to provoke aggressive strikes. Even better, we have introduced new colours for this year including UV colours and real scales – an irresistible lure just got even better.

- UV colours
- Loose scales
- Great jerk and twitch action
- 3D scanned details
- Perfect horizontal balance
- Magnetic, silent long-cast system
- Three ultra-sharp strong saltwater treble hooks

CAST HACKER

Product Code: SGK320

Small but mighty, the Cast Hacker is made for serious saltwater game fishing. This tough and solid Thru Wired hard lure has been designed with a 'small and compact' philosophy – small enough to fool predators, but strong enough to deal with any challenge. With outstanding castability, you'll be punching this lure up to 120 metres with ease – from the shore it can cover huge distances and search from the bottom to the surface, while in offshore fishing it can be cast into the feeding frenzy fish from great distance.

The FS models have a vivid falling action that's able to trigger strikes even from lazy fish and can be used with slower twitches – they also have amazing skipping action if they are retrieved fast with the rod high. The XS models have a very fast 'dead fish' fall, even longer casting ability and can be used with more aggressive twitching, even in severe weather conditions for active fish. The XS can reach deep spots fast, no matter how strong the current. This tungsten-tuned lure also features an internal rattle and is sure to become a must-have lure for inshore and offshore anglers alike.

- Ultra-long cast design
- Great slide and skipping action
- VMS – vivid movement system
- Tungsten tuned

3D NEEDLEFISH PULSE TAIL

Product Code: SGK084

By making a 3D scan of a real needlefish, we have created what we think is the perfect needlefish imitation. The lure not only looks like a needlefish, it acts like one. We equipped the lure with our unique Pulse Tail, giving it a very discreet vibration and tail action just like a real needlefish.

It features heavy-duty forged carbon steel hooks in Perma Steel finish. Depending on the size and jig head, they can be used for shore and boat spinning, vertical fishing or even trolling.

The lure will swim on retrieve and on the drop and at both high and low speeds. The PVC body is quite durable, but each lure is supplied with a spare tail just in case.

- 3D scanned details
- Ultra-life like Pulse Tail action
- Carbon steel forged J-hook in TIN finish
- Body pinch holder
- Belly ring for add-on treble or stinger hook
- Spare tail supplied

3D SWIM SQUID

Product Code: SGK081

Based on the scan of a real squid, with superb details and a super realistic profile, this lure swims and looks just like a real squid and will fool even the most wary predator fish.

The loose body PVC lure can be rigged in many ways – it has a Line Thru channel for easy rigging and a slot in the back for weedless EWG rigging. Can be rigged easily on jig heads and corkscrew heads.

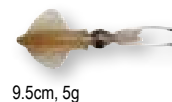

The body fins pulse and the tentacles vibrate as the lure moves through the water, making this lure the perfect squid imitation.

- 3D scanned details
- Line Thru channel for easy rigging
- Weedless EWG hook slot
- Ultra-lively lifelike action
- Scented with squid scent

VIB BLADE SW

Product Code: SGK260

Combining the shape of a baitfish and the vibration of a blade, this lure has a super flashing and strong action, that can cover midwater and bottom areas – both in current and still water. The lure has 3 attach points, that have different vibrating actions. Perfect for mackerel, sea-bass, needlefish, small tunnies and groupers.

- Long casting blade
- Vibrating and flashing
- VMS – vivid movement system
- Multiple attach points
- SGY Saltwater UAR NP trebles (4G #18 1X) (8.5G #16 3X) (14.5G #12 3X)

SARDINE SLIDER

Product Code: SGK275

This super long casting, flat-sided jig features a hydrodynamic head shape that helps to eliminate tension during jigging. This innovative design is combined with outstanding flashing on the flat areas that will reflect even in low light conditions. The lure is also equipped with UV colours, an alluring semi long body and real fish scale details – it's designed to do an amazing job with minimum effort. Use the amazing sinking action to produce spins, stops and a sliding movement that will result in multiple strikes during the fall.

- Super long cast design
- UV Active
- Bright, effective flashing
- Strong, durable finish
- Designed for strikes while falling

SARDINE GLIDER

Product Code: SGK274

This slow jigging, flat-sided lure features a hydrodynamic head shape that helps to eliminate tension during jigging. This innovative design is combined with outstanding flashing on the flat areas that will stand out even in deep low light conditions. The lure is also equipped with a built-in rattle and real fish scale details – it's designed to do an amazing job with minimum effort. The sinking action of the lure produces amazing spins, stops and sliding movements that will entice plenty of bites during the fall – perfect for the long fall slow style.

- Bright, effective flashing
- UV Active
- Built-in rattle
- Strong, durable finish
- Designed for strikes while falling

UV NEEDLE JIG

Product Code: SGK134

The Needle Jig is the perfect metal imitation of a needlefish. The long, slim body will cast a mile and has very little resistance in the water. The geometric profile makes the lure shimmer and flash on the fall, sliding and rolling away from the retrieve line. This sends out flashes and vibrations in a very erratic movement pattern. The body has a built-in steel rattle that sends out a loud click sound when jigging, helping to attract predator fish from distance.

The Needle Jig has a hybrid action and can be used equally effectively for vertical jigging, shore jigging, cast jigging and slow jigging.

- 3D scanned face details
- Long casting design
- Super vivid action on the drop
- Very little resistance
- Built-in steel rattle (except 7gr and 20gr sizes)
- Photo printed details
- Super durable coating

3D JIG MINNOW

Product Code: SGK076

Based on the scan of a baby sardine, the Jig Minnow is designed to cast far and reach depth quickly, even in stronger currents. Despite the relatively fast sink rate, the lure shimmers vividly and vibrates like a wounded fish on the fall.

The Jig Minnow is extremely easy to use and designed for gentle jigging. It does not need much effort or speed to get a strike. Perfect for vertical jigging and cast jigging.

- 3D scanned face details
- Long casting design
- Super vivid action on the drop
- Photo printed details
- Super durable coating
- Pre-rigged with super sharp trebles and assist hooks

3D SLIM JIG MINNOW

Product Code: SGK077

Based on the scan of a baby sardine, the Slim Jig Minnow is designed to cast far and reach depth quickly, even in stronger currents. Despite the relatively fast sink rate, the lure shimmers vividly and vibrates like a wounded fish on the fall. The Slim Jig Minnow is designed for gentle jigging and does not need too much effort or speed to get a strike. The lure has a built-in steel rattle that will make a loud sound when jigged.

The Slim Jig Minnow has hybrid action and can be used equally effectively for slow jigging, vertical jigging, shore jigging or cast jigging.

- 3D scanned face details
- Long casting design
- Super vivid action on the drop
- Built-in steel rattle
- Photo printed details
- Super durable coating
- Pre-rigged with super sharp twin assist hooks

SWIMSQUID INCHIKU

Product Code: SGK323

You won't believe this isn't a real squid, and more importantly, neither will big snappers, groupers and other pelagic predators. The Swimsquid Inchiku lure has an incredibly lifelike squid swimming action and is designed to be used with slow jigging equipment on light tackle. With slow, gentle jerks the scented tentacles will move in a very enticing way and – combined with the realistic glow skirt – will help attract predators from far around. This lure looks fantastic on the fall and also features a built-in steel rattle and realistic 3D cuttlefish eyes. There are also two different rings so you can fish the lure with different actions.

- Scented skirt with squid scent
- Hydro Lock Ribbing
- 3D cuttlefish eyes
- Super-realistic skirt
- Built-in steel rattle
- Super-durable coating
- Pre-rigged with super-sharp twin assist hooks

Extremely durable TPE tentacles

Built-in steel rattle

Bubble catch traps

Belly ring for assist hooks

3D OCTOPUS

Product Code: SGK083

The 3D Octopus is based on a scan of a baby octopus – the body is lead alloy and the tentacles are made from super durable soft TPE. The lure has almost zero resistance in water on the drop and will make wide darts when jigged slowly. On the pause, the lure will hang in a realistic posture, and the tentacles will move at even the slightest current.

For the bigger sizes – 120, 185 and 300g – the lure has an adaptive tie-point bridge to ease retrieves from deep.

Featuring Super Glow paint and skirt along with a built-in rattle chamber and bubble catch, the 3D Octopus hits every visual, auditory and sensory point that triggers feeding and aggression from predator fish. Built tough with extra heavy-duty hardware, the 3D Octopus is designed to take on the most savage predatory game fish on the ocean floor.

- Based on a 3D Scan of a baby octopus
- Built-in steel rattle chamber, attracting fish from a distance
- Rail for sliding tie-point for easy retrieve from deep (3 biggest sizes)
- Bubble catch traps air and releases bubbles at depth
- Super long-lasting glow effects on body and tentacles
- Extremely durable TPE tentacles
- Super lifelike action and micro movement from tentacles
- Wide darting action on jigging
- Extra-heavy hook to tackle the largest game fish
- Belly ring for assist hooks or blade add on

SQUID BEAT EGI

Product Code: SGK276

We've taken squid lures to the next level with the unique qualities and features of the Squid Beat Egi. Combining eye-catching flashes, a real-touch skin feel and glow details, this lure is fitted with double rings to offer versatility to how you fish it. The front ring is for the traditional egi style, while the upper ring can serve the angler in two ways. Firstly, it will reduce the dart action when jerking, which is helpful to keep the lure deeper for longer – a handy attribute when fishing deeper areas or when targeting bottom-feeding cuttlefish. Secondly, this upper ring is also perfect for offshore egi fishing. The lure is also equipped with a dampened rattle system that produces a natural pulsing sound to pull in the squid from miles around.

- Super reflective foil
- Long cast design
- UV Active
- Two ring design for deep or shallow fishing
- Pulse rattle system
- Super Glow details
- Super sharp and strong hooks

SQUID BEAT TROLLING

Product Code: SGK277

If you can't beat 'em, troll 'em! This unique trolling lure combines eye-catching flashing with real-touch feeling and glow details. Even though this lure has been designed for trolling, it can also be used effectively for casting, so it works well for inshore squid fishing too. The real killer for this lure is the stunning action, combined with a dampened rattle system that produces a natural pulse sound with each jerk. It's a new secret weapon in squid fishing.

- Super reflective foil
- UV Active
- Dampened rattle system
- Super Glow details
- Super sharp and strong hooks

The Savage Gear line collection continues to grow and offers specialist lines for almost every lure fishing application. We offer technical braided line in eight-strand and four-strand versions, high quality fluorocarbon leaders that are invisible in water and offer unbeatable knot strength, and even steel wire, which is perfect for creating your own custom rigs and traces.

New for this year, we have expanded the collection of saltwater specific lines by introducing four new leaders: the Super Hard Savage Leader, Super Soft Egi Leader, Semi-Soft Seabass Leader, and Semi-Soft Micro Leader. These 100 per cent fluorocarbon leaders are invisible in water and offer great knot strength, abrasion resistance, great feel and are all UV and chemical resistant. Perfect for withstanding the unique challenges of saltwater fishing.

HD8 SILENCER BRAID

Product Code: SGI001

A tight, round, precision pitch 8braid made from High Dexterity Super PE. A super silent formula and silk-smooth. Silicone infused, ultra-strong and abrasion resistant.

- Round and silk-smooth
- Super silent formula
- Ultra abrasion resistant
- Incredible strength
- Zero stretch

There aren't many more effective techniques for catching ferocious predator fish than using loose body soft lures. But the success of this hugely popular method can sometimes come down to the small differences – such as what kind of jig head you use. Luckily, Savage Gear has a comprehensive range of innovative, high-quality jig heads made from high-grade forged carbon steel wire and featuring ultra-sharp nano hook points. Soft lures stay securely in place on our jig heads thanks to the stainless steel body holders and our innovative Pro Peg holder – which not only keeps your lure in place cast after cast but also helps with perfect presentation.

Each jig head in the range has been designed with the optimum balance of wire strength and wire diameter, so you can always fish with precision without fear of hook pulls. No matter which model, weight or size of jig head you choose, you can be sure that a Savage Gear jig head won't let you down in your chosen style of fishing.

BALL JIGHEAD

Product Code: SGT102

Success in fishing comes down to attention to detail – even with small items like jig heads. That's why we designed these Savage ball jig heads, featuring ultra-sharp, forged high carbon steel wire hooks with nano points and micro barbs. Each hook size has also been carefully designed with the perfect wire diameter for optimised strength and penetration.

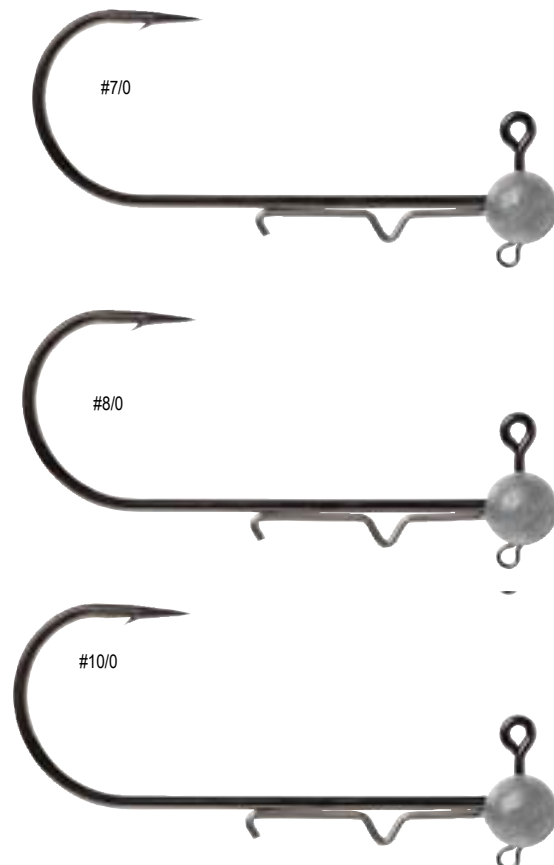

The precision moulded round heads come in a range of sizes suitable for a wide selection of soft lures. They also feature three different types of body holders, to make sure your soft lure is securely held in place no matter what you're fishing for.

STANDUP JIGHEAD

Product Code: SGT103

Make your soft lures work hard for you on the bottom with these Savage stand-up jig heads. The shape of the head makes the soft lure stand up on the bottom like a minnow feeding, but also provides super rolling swimming action with paddle tail lures and great horizontal balance for vertical pelagic fishing.

Featuring ultra-sharp, forged high carbon steel wire hooks with nano points and micro barbs. Each hook size has also been carefully designed with the perfect wire diameter for optimised strength and penetration.

The precision moulded round heads come in a range of sizes suitable for a wide selection of small to medium soft lures. The stainless steel wire body holder also features a no-twist design and Pro Peg loop.

NED JIGHEAD

Product Code: SGT104

A precision moulded Ned head range with sizes perfect for smaller and medium soft lures. The shape of the head makes the soft lure stand up straight on the bottom and enables you to drag the head along, with pauses, provoking hard strikes from hungry predators.

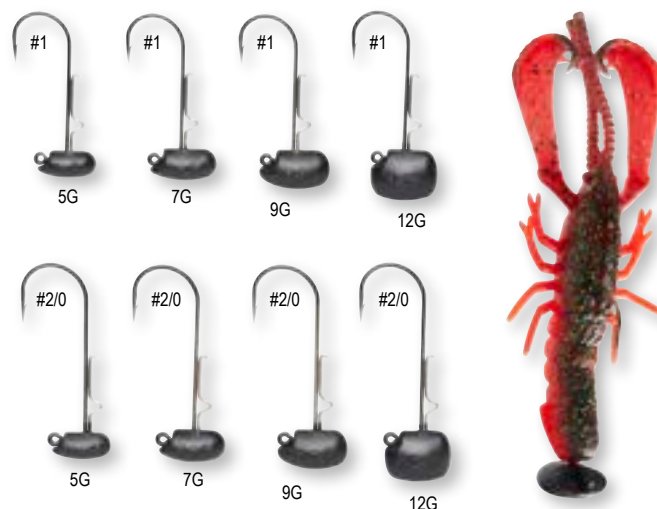

Featuring ultra-sharp, forged high carbon steel wire hooks with nano points and micro barbs. Each hook size has also been carefully designed with the perfect wire diameter for optimised strength and penetration.

The stainless steel wire body holder also features a Pro Peg loop and barb.

RATTLING JIGHEAD NL

Product Code: SGT087

Add an extra dimension to your fishing with these stand-up rattling jig heads that feature built-in stainless steel rattle chambers for added attraction. The jig heads send out a clear and loud sound through the water with the slightest jig or any contact with the bottom and call in curious predators such as cod, pollack and coalfish from miles around. As well as offering the added attraction power of sound, these jig heads are built to perform with needle pinch soft lure body holders and super-sharp carbon steel hooks – they fish perfectly with our Cannibal and Herring shads. Designed to give you the edge when the fishing gets tough.

SOFT FLUOROCARBON

Product Code: SGT010

Fluorocarbon is much less visible underwater compared to regular monofilament and virtually invisible to fish. This 100 per cent fluorocarbon is soft, UV resistant, chemical resistant, non-absorbent and gives the perfect presentation and action of your bait or lure in the water.

- Invisible in water
- Super soft
- High knot strength
- 100 per cent fluorocarbon
- Shock-absorbent leader

REGENERATOR MONO

Product Code: SGT011

Regenerator is a soft, virtually invisible mono line made from a very strong and abrasion-resistant Co-polymer. The line is UV-resistant, chemical-resistant, non-absorbent and the super soft formula gives the perfect presentation of your bait or lure in the water. Our formula is very resistant to cuts and pike teeth, combined with incredible knot strength and elasticity – the Regenerator is the perfect trace material for toothy predator fish.

- Virtually invisible
- Crimpable
- High knot strength
- Incredible abrasion resistance
- Shock-absorbent leader

SUPER SOFT FLUOROCARBON EGI

Product Code: SGT067

As the name suggests, this 100% fluorocarbon leader has been designed specifically to help you fish egi lures more effectively than ever before. It has unrivalled softness that allows egi lures to move more freely in the water and helps you land squid more easily – even if they are poorly hooked. The light pink colour minimises flashing in the water and remains largely invisible to squid, giving you excellent presentation.

- 100% fluorocarbon
- Light pink colour is invisible in water to squid
- Super soft and supple
- High knot strength
- UV and chemical resistant
- Specially designed for fishing egi

SEMI-SOFT FLUOROCARBON SEABASS

Product Code: SGT068

Designed to provide the perfect performance for seabass lures our 100% fluorocarbon Semi-Soft Seabass Leader offers you the optimum blend between softness and tough abrasion resistance. The leader is soft enough to allow for delicate presentation while being tough enough to resist getting damaged on rocks. It is at its best when fished with topwater lures, softlures, jerkbaits and pencils and has an incredible hook set ratio that will help you land even poorly hooked fish.

- 100% fluorocarbon
- Invisible in water
- Perfect blend of softness and abrasion resistance
- High knot strength
- UV and chemical resistant
- Shock absorbent
- Specialised for seabass fishing

SUPER HARD FLUOROCARBON

Product Code: SGT069

When you need to rely on your gear to help you catch monster fish in tough conditions, then it's time to reach for our Super Hard Savage Leader. Made from a super hard fluorocarbon material, this leader can withstand all kind of punishment from rocks and other hazards and still offer you the ability to deliver a sharp action to your jigs, soft lures and hard lures, even in deep water. The minimal stretch means you can also set the hook instantly. It's perfect for inshore and offshore power game – for fish that know how to play dirty, you now have the weapon to fight back.

- 100% super hard fluorocarbon
- Invisible in water
- Instant hook setting
- Superior knot strength
- UV and chemical resistant
- Unmatched abrasion resistance
- Perfect for big, powerful game fish

MICRO ASSIST HOOKS

Product Code: SGT003

Our Micro Assist hook range is specially designed to fit all smaller jigs from 5g up to 80g. The super strong and lightweight hooks are tied to blood red hollow fluorocarbon core braid. The shape of our Micro Assist hooks perfectly matches the body shape of most jigs and the unique rigging offers excellent hook-up rates. You can add one or two Micro Assist hooks to your jig and remove the treble hook, to give a better jig performance and less snagging on the rocks.

- Japanese XC75 carbon steel
- Super light and strong
- Ultimate sharpness
- Super PE fluorocarbon core red cord
- Flashing teasers
- Zero-tangle design

Suggested use: Micro Assist hooks perfectly match all jigs from 5g to 80g. They are best used for micro shore jigging, light jigging, shore jigging, cast jigging and micro vertical jigging techniques.

BLOODY ASSIST HOOKS

Product Code: SGT004

Our single and double Bloody Assist hook range is specially designed to perfectly fit our needle jig and slim jig minnows. The super strong and lightweight hooks are tied to blood red hollow fluorocarbon core PE Braid. The shape of our hooks perfectly match the body shape of the most common jigs and the unique looped rigging gives an excellent hook-up rate. We have wrapped the braid all the way to the end of the shank of the hooks, so they move more freely and don't tangle or scratch the jig.

Super-sharp forged hooks made from Japanese XC75 carbon steel and epoxy-coated wrappings.

- Japanese XC75 carbon steel
- Super light and strong hooks
- Ultimate sharpness
- Super PE fluorocarbon core red PE cord
- Epoxy coated, no-scratch full wrappings
- Zero-tangle design

Suggested use: single Bloody Assist hooks have medium-length cord and are ideal for rigging semi-long and long jigs from one side, adding one or two in the split ring. They are best used for light jigging, shore jigging, cast jigging and vertical jigging techniques.

Suggested use: twin Bloody Assist hooks have short cord and are ideal for rigging slow jigs from both sides, as well as normal short jigs from one side. They are suggested for slow jigging, light jigging, shore jigging, cast jigging and vertical jigging techniques.

SOLID RINGS

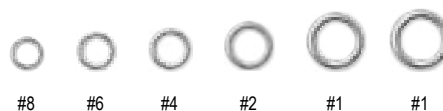

Product Code: SGT096

When fishing in harsh, saltwater environments you should make no compromises with your tackle – that is why we have produced these super strong, stainless steel solid rings. Able to withstand high salinity water with no corrosion, these rings are designed for maximum strength and performance. They feature a round-edged body, which reduces the chance of damage to leaders when under pressure. They are ideal for jigging, shore jigging and any other demanding offshore or inshore saltwater fishing styles.

- Corrosion resistant
- Super strong stainless steel

S1 SINGLE HOOK KIT

Product Code: SGT009

These single hooks are ideal for our Line Thru Sandeel and Line Thru Seeker lures. Pre-rigged with an easy-change oval split ring and selections of beads in a mixture of colours – in UV, Glow and neutral colours.

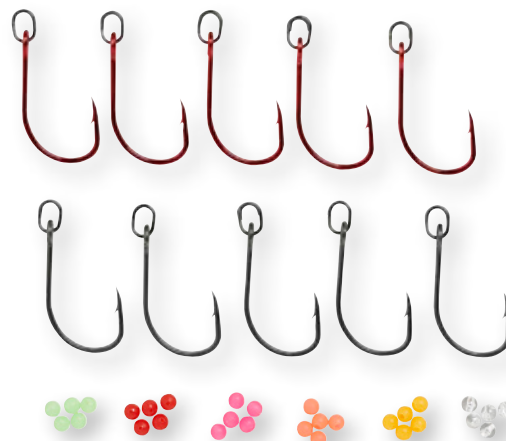

The combination of UV coloured beads creates a great strike point and can drive trout crazy. Slide a soft bead onto the line to protect the knot, followed by a hard clear bead, and you have the perfect presentation for your Line Thru lure.

Each kit contains:

- 10 ultra-sharp singles hooks
- Pre-rigged oval split rings
- Five blood red hooks
- Five dark grey hooks
- 30 beads: 25 soft style, five of each colour in UV, Glow and neutral colours, and five glass clear hard beads

Having the use of a boat, bellyboat or other watercraft can give your fishing the extra edge – and at Savage Gear we have a range of options to help you get onto the hot fishing spots more easily. Our kayaks are packed with innovative features such as high seating positions to give you the optimum view, and super stable designs that won't wobble around or disturb the water as you move around. We also have belly boats for those that like to be at one with the water they're fishing. These are supplied with air pumps, and we also produce specialised flippers to silently propel yourself around. Savage Gear also offers a series of motors to attach to your boat or other watercraft, allowing you to quickly and stealthily cover as much water as possible to find the fish.

E-RIDER KAYAK

Product Code: SGC002

Sit high and stable, well above the water with our E-Rider kayak – perfectly designed for fishing. The kayak is very easy to manoeuvre and glides across the water's surface with little resistance. It's equipped with a strong yet lightweight three-section, fold-down, 260cm double paddle, and an engine mount stern for up to 7HK engines.

A front aluminium cross seat bar provides a perfect place for mounting rod holders, while there's also a double rear cross seat bar, to add a cushion.

The kayak has a strong rope lining on each side, for attaching fixed or drift anchors. It comfortably seats two and the design is ideal for usage with a kayak wagon.

- 0.9mm armoured PVC sheet main frame
- 8cm armoured PVC drop stitch floor
- Three Protech air valves
- Lightweight, three-section double paddle (length: 260cm)
- Aluminium stabilising cross bar seats
- Slide-on stabiliser fin
- Engine mount stern for engine mount
- One-way water valve in stern
- Practical hand pump included
- Repair Pro Kit included
- Pack down strap
- Recommend psi pressure: tubes 3.6psi, floor 10psi
- 330cm x 110cm x 30cm

BELLY BOAT PRO-MOTOR 180

Product Code: SGC009

The flagship model of the famous Savage Gear belly boat range – this baby is ready for action, just like you are. While Float Plus-ready, the boat can also be fitted with a more traditional electric trolling engine – the bumper features a gap specifically to help you properly glue on a motor mount. The unique structure of the bow means that the centre of gravity is more balance after placing an engine there – this greatly improves the boats overall balance and steering. The new design of this belly boat is 10cm longer than the previous iteration, further increasing buoyancy and balance, while the drop stitch seat features EVA padding to give exceptional sitting comfort. The bags are waterproof, sturdy and very stable and there is also a waterproof bag in the front of the bow. Customisation is key with this belly boat – all the tube ends are empty so you can easily equip your desired accessories such as fish finders or rod supports with glue-on pads. Supplied with an easy-to-use hand pump and pressure clock, so you can always be sure it is inflated to the optimum pressure.

This is the perfect vessel for the true belly boat specialist – primed for electric engines and other accessories – this is the king of belly boats with no rivals on the market.

- Float-Plus ready
- Trolling engine mount friendly
- Unique bow for improved steering properties
- Extra-long for more stability
- Glue-on pad friendly
- Inflatable bottom
- Comfortable EVA seat padding
- Four sturdy, super-stable waterproof bags
- Two air chambers
- Non-slip seat straps
- Extra-long drag pads
- Lightweight: 15kg (including all bags)
- Length: 180cm
- Handpump with pressure clock included

HIGH RIDER V2 BELLY BOAT 150

Product Code: SGC003

- Built from a 0.9mm armoured PVC sheet
- Armoured PVC drop stitch floor and seat
- Heat sealed and reinforced seams
- Four Protech air valves – pontoon valves off-set for pad mounting
- Three waterproof EVA side bags
- Waterproof EVA front bag
- Adjustable footrest
- Backpack carry straps
- Drag strap and drag pads
- Repair pro kit
- Practical hand pump included
- Recommend psi pressure: tube 3.6 psi, floor 10 psi
- Net weight: 12kg
- Total length: 150cm
- Max load: 125kg
- Detachable luggage net and robust, easy-access side bags

HIGH RIDER V2 BELLY BOAT

The perfect belly boat – designed and developed by anglers, for anglers.

In the HighRider V2 you will sit well above the waterline, in a very comfortable seat, that can easily be adjusted.

The boat is straightforward to manoeuvre and cuts effortlessly through the water. The two-chamber construction gives the angler extra security.

It also features a rigid U-frame with drop stitch air chamber floor, for extra high seating, comfort, and stability.

HIGH RIDER V2 BELLY BOAT 170

Product Code: SGC003

- Built from a 0.9mm armoured PVC sheet
- Armoured PVC drop stitch floor and seat
- Heat sealed and reinforced seams
- Four Protech air valves, pontoon valves off-set for pad mounting
- Lightweight, detachable oars
- Three waterproof EVA side bags
- Waterproof EVA front bag
- Adjustable footrest
- Backpack carry straps
- Drag strap and drag pads
- Repair pro kit
- Practical hand pump included
- Recommend psi pressure: tube 3.6 psi, floor 10 psi
- Net weight: 14kg
- Total length: 170cm
- Max load: 150kg
- Detachable luggage net and robust, easy-access side bags

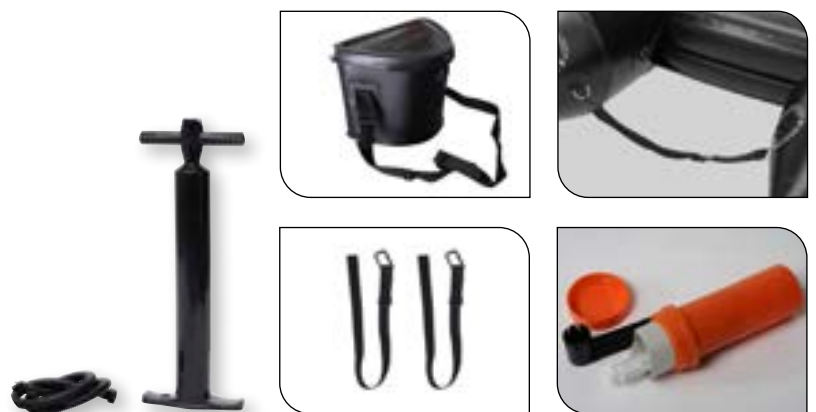

It is supplied with three waterproof EVA side boxes, with click lids and practical sliding rail strap system, as well as a large waterproof front bucket, also with click lid for safe storage.

We added drag pads under the frame so the boat can be dragged safely across ground on short venue changes. This is also aided by the practical front drag strap, that also locks the seat in place during transport with backpack straps.

It also features an easy-detachable crossbar and apron with measuring print, and offset pontoon air valves, giving space for mounts for echo sounders.

A DISPLAY TO GIVE YOUR SALES A THRUST

One of the easiest ways to make a sale is to let consumers touch and feel the product – so that's exactly what this display for the Savage Gear Thruster engine allows. The LED lights at the sides of the display easily catch the attention of passers-by, and the engine can be simply connected to power with a battery (battery not included), so customers can try and feel the high-quality components for themselves.

The propeller is safely housed in an acrylic box to avoid any accidents, but still allows a clear view of it in action. This eye-catching display is a very easy way to help you sell more of a high-value Savage Gear product.

Often overlooked, the humble net can be one of the most important pieces of your fishing tackle outfit. We have gone back to the drawing board with the Savage Gear net range and revamped many of the models to ensure that you can always rely on them to land your prize catch. We have super durable nets capable of landing the biggest of monster pike, handy foldable designs that are easy to store and transport, and even models designed for street fishing with long telescopic handles. All our nets are designed to be easy to use and are fish friendly too, so you can practice catch and release with confidence.

TWIST & FOLD NET

Product Code: SGN011

Ideal for fishing from either the boat or the bank, the Twist and Fold net is a reliable fish lander that doesn't take up too much space. On the spreader block there is a small switch for folding the net double. The handle easily locks in the spreader block at any desired position via the twist-lock system. The net is small and easy to carry when folded but can be opened up in a matter of seconds, so you'll never be caught off guard. It also features fish-friendly rubberised mesh – perfect for lure fishing.

- For boat and bank fishing
- Twist-lock handle
- Great for lure fishing
- Fish friendly rubber mesh

The best anglers are organised and keep everything to hand – something that is made much easier with the Savage Gear range of lure boxes. Available in a wide range of shapes and sizes to accommodate everything from tiny soft lures for dropshotting all the way through to huge, noisy jerkbaits, there is a Savage Gear lure box for everyone. Many of the boxes in the range have useful and innovative features, such as smoke grey colouring on the lids to protect the contents from UV damage, and sealed snap lids to keep water out. You can also customise the layouts of many of our boxes to ensure that everything is right where you expect it to be next time you head out on a fishing trip.

Having the right equipment with you at the right time is sometimes half the battle for having a successful fishing trip. Luckily, Savage Gear has an ever-expanding luggage range that offers tackle transport solutions for every fishing situation you can think of. Whether you need a huge bag to carry boxes and boxes of lures in your boat, or a lightweight sling or backpack to just take the essentials so you can stay light on your feet, Savage Gear has the answers. The collection has grown for this year to include new boat and bank bag, cooler bag, lure carryall, lure bags, rod bags and even car seat rod racks.

JIG WALLET

Product Code: SGL035

Keep your saltwater fishing gear tidy and organised with this range of roll-ups, jig wallets and jig bags, specifically designed for the rigours of saltwater. This range will keep your jigs protected and stop them from scratching each other even when rigged with assist hooks. While the jig bags and jig wallets feature a washable design – you can wash all jigs and the bag without removing them from the wallets, and then let them dry there too. Once dry, you can simply roll or fold the wallet or bag up and it's ready for your next fishing trip. It couldn't be easier.

- Splashproof
- Breathable mesh – allows the jigs and assist hook cords to dry
- Strong reinforced construction
- Long lasting Velcro straps
- Easy to wash the jigs and let them dry

LRF LIP GRIP ALU

Product Code: SGA059

A must-have tool for every LRF angler, this strong and lightweight aluminium fish grip is designed to take punishment in harsh saltwater conditions over and over again. Designed with the perfect angle to enter the mouth of every small predator fish, the grip will ensure you can hold your catch for a photo and unhook it safely before returning it to its watery domain. Rinse with lukewarm water after each use to help further protect against saltwater corrosion.

- Saltwater resistant
- Designed to be fish-friendly
- Strong and durable
- Secure way to hold and unhook fish

LIGHT GAME LIP GRIP ALU

Product Code: SGA060

The perfect choice for light game anglers or spinning, this lip grip is the perfect size for holding small to medium-sized species such as sea bass and sea bream. The flat design of the jaws means you can hold fish securely without penetrating their mouth membranes, making it possible to quickly and easily unhook your catch, pose for a photo and return it safely to its watery domain – all while protecting your fingers from razor-sharp gills, teeth and spines. The aluminium grip is extremely saltwater resistant, but you can prolong its life by rinsing with lukewarm water after each use.

- Saltwater resistant
- Designed to be fish-friendly
- Strong and durable
- Secure way to hold and unhook fish

FLOATING LIP GRIP

Product Code: SGA061

This strong, lightweight and extremely useful lip grip will help you safely handle even the largest of fish. The flat grip is very fish-friendly yet still has a secure hold so you can safely remove hooks without risk of injury from razor-sharp teeth, gills or spines. This grip also floats, so don't worry if you accidentally drop it in water. It's the perfect way to protect both fish and anglers – a handy tool that will quickly become one of the first things you pack on your future fishing trips.

- Designed to be fish-friendly
- Strong and durable
- Floats if dropped in water
- Secure way to hold and unhook fish
- Lightweight

SAFETY FISH GRIP

Product Code: SGA062

A superbly user-friendly and fish-friendly grip that has mainly been designed for LRF or light game anglers who often encounter venomous scorpionfish and dragonfish. The grip is very popular in Japan for Aji fishing (mackerel) too. A perfect tool to hold smaller fish still while you unhook them and safely return them to their watery abodes.

- Protection from venomous species
- Perfect for LRF, light game or Aji fishing
- Strong and durable
- Designed to be fish-friendly

SG6 WADING JACKET

Product Code: SGG096

Raging winds, torrential downpours, Toray Dermizax high performance fabric powerful waves and spray – it will all become a walk in the park for you with our SG6 Wading jacket. Featuring a Toray Dermizax fabric that offers incredible durability, protection from the wet and the cold, and flexibility of movement, this is a jacket designed to perform in the toughest fishing conditions.

Waterproof, breathable, lightweight and hard-wearing, the SG6 is packed with fishing-specific features such as: large expandable chest pockets, a retractor and tool patches, adjustable cuffs, fleece-lined collar, adjustable hood with rigid peak, reflective points for added safety and plenty of pockets with waterproof zippers. The jacket also incorporates roomy design around the arms and shoulder so as not to inhibit casting ability. Every aspect of this jacket is built to stand up to the harshest conditions that the world can throw at it, meaning you can spend less time checking the weather forecast and more time out there chasing that fish of a lifetime. Who knows, with this jacket, you may even begin to enjoy the bad weather?

- Four-way stretch Toray fabric – 84 per cent nylon, 16 per cent spandex with Dermizax membrane
- 20,000mm/10,000mvp and Toray DWR finish
- Very light and flexible fabric
- Taped seams
- Expandable chest pockets
- Retractor and tool patches
- Handwarmer pockets
- Improved cuff adjuster with inner cuff
- Fit allows active movement

SG4 WADING JACKET

Product Code: SGG095

When battle commences with a big fish, the last thing you want to be worrying about is being cold and wet. Thankfully our SG4 Wading jacket offers you premium protection from the elements with a host of fishing-specific design innovations so good, that you'll forget you're wearing it.

Featuring a durable three-layer construction of 100 per cent nylon Taslon Oxford fabric, TPU membrane, and Teflon finish, this jacket is your own personal shield against rain and saltwater spray. The jacket has plenty of useful fishing features such as large chest pockets, stretchy material on the elbows and underarms for freedom of movement when casting, stretch fabric on the cuffs with Velcro adjustment, a rigid peak on the hood, rear plastic buckle for attaching a net, and reflective material on shoulders for added safety.

This wading jacket fits perfectly into the rest of the SG4 range and takes your attention away from the weather conditions and lets you focus on the battle in hand.

- Durable three-layer material
- 100 per cent nylon Taslon Oxford fabric
- TPU membrane 10.000mm/5,000mvp
- Teflon finish
- Waterproof and highly breathable
- Taped seams
- Water repellent zippers
- Handwarmer pockets
- Flexible fabric at elbows for greater freedom of movement
- Reflective print on shoulders and underarms
- Large back pocket
- Adjustable cuffs

SG2 HYBRID JACKET

Product Code: SGG094

When the weather takes one of its unpredictable turns, you need high quality clothing that you can rely on to keep you outdoors and keep you fishing. Enter the SG2 Hybrid jacket – a two-layer, waterproof and breathable outer layer that's packed with features and smart design innovations so good, you'll forget you're wearing it. The jacket is waterproof and breathable thanks to a durable nylon Taslon construction and PU coating, complete with DWR finish. We designed the SG2 to have plenty of fishing features, like soft stretch fabric cuffs with Velcro adjustment, large chest pockets, spacious sleeves for casting, waterproof zippers, a fleece-lined collar, and a structured peak on the hood. However, we packaged all these features into a stylish

design that looks just at home on the bank, as it does on a hike in the mountains, or walking even around town. It's a jacket for all occasions.

- Technical, two-layer jacket
- Waterproof and breathable, 10.000mm/3.000mvp
- Durable 100 per cent nylon Taslon fabric with thick PU coating
- DWR finish
- Handwarmer pocket with inner fleece
- Large front pockets
- Mesh lining for added comfort

PRO-TACT SPINNING VEST

Product Code: SGG122

The Pro-Tact Spinning Vest is equipped with many small zipped pockets on the front side that offer almost endless storage possibilities. Each of the 2 front pockets holds a "S" lure case, offering plenty of space for lures. On the inside there is one big mesh pocket on each side. The backpack has a 3-layer construction to allow the angler to keep everything organized and easily accessible. Fully adjustable shoulder- and side straps to fit most people and most waist sizes.

Like most models in the Pro-Tact Luggage series the Spinning Vest comes including a carbon steel plier with split-ring, cutting and crimping function.

- Includes 2 "S" Lure Cases (17.5X14.5X4.5cm) in gunsmoke color
- Includes a carbon steel plier with split-ring, cutting and crimping function
- 100% waterproof outer material (100% Polyester) in black color, with an extremely smooth, easy to clean and scratch resistant surface
- Outer pockets made of very durable dark grey 600D rip-stop material
- High-quality zippers in red color with rubber zipper pullers
- Thick padded shoulder straps (adjustable)
- Backpack with 3 level design to keep everything organized

THERMO PRO GLOVE

Product Code: SGG118

When you need all-out protection against harsh and cold weather, the Thermo Pro gloves are your best form of defence – and with a nice helping of style. These waterproof gloves feature the thickest insulation in our range but still retain a comfortable and ergonomic fit thanks to their stretchy fabric. A double cuff means you can create a seal with your jacket to prevent wind or rain getting in and the added non-slip texture on the palms and fingers gives you optimum grip no matter how bad the conditions get. These gloves go exceptionally well with Savage Gear thermal suits.

- Waterproof
- Soft and flexible technical material
- Soft fleece lining
- Structured rubber grip inside palm and fingertips
- Double cuff design to keep wind and rain out
- Ergonomic fit
- Available in medium, large and extra-large sizes
- 60%nylon / 30%polyester / 10%elastane

GIVE YOUR SALES A HELPING HAND

Whether your customers are fly fishing fanatics, lure lovers or carp connoisseurs, our new all-encompassing range of gloves will have something to help them.

Gloves are probably not considered the most exciting products in the world, but you can make them exciting with our stylish and eye-catching display, which will help increase interest in them in your store.

This high-quality, free-standing display can be placed almost anywhere in your store and is perfect for reminding your customers that actually, yes, their hands were pretty cold last time they went fishing.

Perfect to stand near the counter or in another high-traffic spot, this display will help you cash in some extra sales that many anglers will be happy to add-on to their other purchases without any fuss.
